Number of shares of Florida Power & Light Company or	ommon stock, without par value, outstanding at June 30, 2025, all	of which were held, beneficially and of reco	rd, by NextEra Energy, Inc.: 1,000
This combined Form 10-Q represents separate filings behalf. Florida Power & Light Company makes no repres	y NextEra Energy, Inc. and Florida Power & Light Company. Info sentations as to the information relating to NextEra Energy, Inc.'s	ormation contained herein relating to an ind other operations.	vidual registrant is filed by that registrant on its own
Florida Power & Light Company meets the conditions se	t forth in General Instruction H.(1)(a) and (b) of Form 10-Q and is	therefore filing this Form with the reduced of	isclosure format.

DEFINITIONS

Acronyms and defined terms used in the text include the following:

<u>Term</u>	<u>Meaning</u>
2021 rate agreement	December 2021 FPSC final order approving a stipulation and settlement between FPL and several intervenors in FPL's base rate proceeding
2024 Form 10-K	NextEra Energy, Inc.'s and Florida Power & Light Company's Annual Report on Form 10-K for the year ended December 31, 2024
AFUDC	allowance for funds used during construction
AFUDC – equity	equity component of AFUDC
ACCI	accumulated other comprehensive income (loss)
CSCS agreement	amended and restated cash sweep and credit support agreement
Duane Arnold	Duane Arnold Energy Center
FERC	U.S. Federal Energy Regulatory Commission
FFL	Florida Power & Light Company
FPSC	Florida Public Service Commission
fuel clause	fuel and purchased power cost recovery clause, as established by the FPSC
GAAP	generally accepted accounting principles in the U.S.
ΠC	investment tax credit
kWh	kilowatt-hour(s)
Management's Discussion	Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
MMBtu	One million British thermal units
MW	megawatt(s)
MWh	megawatt-hour(s)
NEE	NextEra Energy, Inc.
NEECH	NextEra Energy Capital Holdings, Inc.
NEER	an operating segment comprised of NextEra Energy Resources and NEET
NET	NextEra Energy Transmission, LLC
net generation	net ownership interest in plant(s) generation
NextEra Energy Resources	NextEra Energy Resources, LLC
Note	Note to condensed consolidated financial statements
NRC	U.S. Nuclear Regulatory Commission
O&M expenses	other operations and maintenance expenses in the condensed consolidated statements of income
oa -	other comprehensive income
OTC	over-the-counter
OTTI	other than temporary impairment or other than temporarily impaired
PTC	production tax credit
regulatory ROE	return on common equity as determined for regulatory purposes
clean energy tax credits	production tax credits and investment tax credits collectively
Seabrook	Seabrook Station
SEC	U.S. Securities and Exchange Commission
XPLR	XPLR Infrastructure, LP (formerly known as NextEra Energy Partners, LP)
XPLR OpCo	XPLR Infrastructure Operating Partners, LP (formerly known as NextEra Energy Operating Partners, LP), a subsidiary of XPLR
U.S.	United States of America
VIE	variable interest entity

NEE, FPL, NEECH, NextEra Energy Resources and NEET each has subsidiaries and affiliates with names that may include NextEra Energy, FPL, NextEra Energy Resources, NextEra Energy Transmission, NextEra, FPL Group, FPL Energy, FPLE and similar references. For convenience and simplicity, in this report the terms NEE, FPL, NEECH, NextEra Energy Resources, NEET and NEER are sometimes used as abbreviated references to specific subsidiaries, affiliates or groups of subsidiaries or affiliates. The precise meaning depends on the context.

FORWARD-LOOKING STATEMENTS

This report includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Any statements that express, or involve discussions as to, expectations, beliefs, plans, objectives, assumptions, strategies, future events or performance (often, but not always, through the use of words or phrases such as: may result, are expected to, will continue, is anticipated, believe, will, could, should, would, estimated, may, plan, potential, future, projection, goals, target, outlook, predict and intend or words of similar meaning) are not statements of historical facts and may be forward looking. Forward-looking statements involve estimates, assumptions and uncertainties. Accordingly, any such statements are qualified in their entirety by reference to, and are accompanied by, the following important factors (in addition to any assumptions and other factors referred to specifically in connection with such forward-looking statements) that could have a significant impact on NEE's and/or FPL's operations and financial results, and could cause NEE's and/or FPL's actual results to differ materially from those contained or implied in forward-looking statements made by or on behalf of NEE and/or FPL in this combined Form 10-Q, in presentations, on their respective websites, in response to questions or otherwise.

Regulatory, Legislative and Legal Risks

- NEE's and FPL's business, financial condition, results of operations and prospects may be materially adversely affected by the extensive regulation of their business
- NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected if they are unable to recover in a timely
 manner any significant amount of costs, a return on certain assets or a reasonable return on invested capital through base rates, cost recovery clauses, other
 regulatory mechanisms or otherwise.
- Regulatory decisions that are important to NEE and FPL may be materially adversely affected by political, regulatory, operational and economic factors.
- Any reductions or modifications to, or the elimination of, governmental incentives or policies that support clean energy, including, but not limited to, tax laws, policies and incentives, renewable portfolio standards and feed-in-tariffs, or the imposition of additional taxes, tariffs, duties or other costs or assessments on clean energy or the equipment necessary to generate, store or deliver it, could result in, among other items, the lack of a satisfactory market for the development and/or financing of new clean energy projects, NEE and FPL abandoning the development of clean energy projects, a loss of investments in clean energy projects and reduced project returns, any of which could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.
- NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected by new or revised laws, regulations or executive orders, as well as by regulatory action or inaction.
- NEE and FPL are subject to numerous environmental laws, regulations and other standards that may result in capital expenditures, increased operating costs and various liabilities, and may require NEE and FPL to limit or eliminate certain operations.
- NEE's and FPL's business could be negatively affected by federal or state laws or regulations mandating new or additional limits on the production of greenhouse gas emissions.
- Extensive federal, state and local government regulation of the operations and businesses of NEE and FPL exposes NEE and FPL to significant and increasing
 compliance costs and may also expose them to substantial monetary penalties and other sanctions for compliance failures.
- Changes in tax laws, guidance or policies, including but not limited to changes in corporate income tax rates, as well as judgments and estimates used in the
 determination of tax-related asset and liability amounts, could materially adversely affect NEE's and FPL's business, financial condition, results of operations
 and prospects.
- NEE's and FPL's business, financial condition, results of operations and prospects may be materially adversely affected due to adverse results of litigation.
- Allegations of violations of law by FPL or NEE have the potential to result in fines, penalties, or other sanctions or effects, as well as cause reputational damage for FPL and NEE, and could hamper FPL's and NEE's effectiveness in interacting with governmental authorities.

Development and Operational Risks

- NEE's and FPL's business, financial condition, results of operations and prospects could suffer if NEE and FPL do not proceed with projects under development
 or are unable to complete the construction of, or capital improvements to, electric generation, storage, transmission and distribution facilities, natural gas and oil
 production and transportation facilities or other facilities on schedule or within budget.
- NEE and FPL face risks related to project siting, financing, construction, permitting, governmental approvals and the negotiation of project development agreements that may impede their development and operating activities.
- The operation and maintenance of NEE's and FPL's electric generation, storage, transmission and distribution facilities, natural gas and oil production and transportation facilities and other facilities are subject to many operational risks, the consequences of which could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

- NEE's and FPL's business, financial condition, results of operations and prospects may be negatively affected by a lack of growth, slower growth or a decline in the number of customers or in customer usage.
- NEE's and FPL's business, financial condition, results of operations and prospects can be materially adversely affected by weather conditions and related impacts, including, but not limited to, the impact of severe weather.
- Threats of terrorism and catastrophic events that could result from geopolitical factors, terrorism, cyberattacks, or individuals and/or groups attempting to disrupt NEE's and FPL's business, or the businesses of third parties, may materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.
- The ability of NEE and FPL to obtain insurance and the terms of any available insurance coverage could be materially adversely affected by international, national, state or local events and company-specific events, as well as the financial condition of insurers. NEE's and FPL's insurance coverage does not provide protection against all significant losses.
- NEE invests in natural gas and oil production assets which are exposed to fluctuating market prices of natural gas, natural gas liquids, oil and other energy
 commodities. A prolonged period of low natural gas and oil prices, disrupted production or unsuccessful drilling efforts could impact NEER's natural gas and oil
 production operations and cause NEER to delay or cancel certain natural gas and oil production projects and could result in certain assets becoming impaired,
 which could materially adversely affect NEE's business, financial condition, results of operations and prospects.
- If cost recovery arrangements for increased supply costs necessary to provide NEER's full energy and capacity requirements services are not favorable, operating costs could increase and materially adversely affect NEE's business, financial condition, results of operations and prospects.
- Due to the potential for significant volatility in market prices for fuel, electricity and environmental and other energy-related commodities, NEE's inability or failure
 to manage properly or hedge effectively the commodity risks within its portfolio could materially adversely affect NEE's business, financial condition, results of
 operations and prospects.
- Reductions in the liquidity of energy markets may restrict NEE's ability to manage its operational risks, which, in turn, could negatively affect NEE's business, financial condition, results of operations and prospects.
- · NEE's and FPL's hedging and trading procedures and associated risk management tools may not protect against significant losses.
- If price movements significantly or persistently deviate from historical behavior, NEE's and FPL's risk management tools associated with their hedging and trading procedures may not protect against significant losses.
- If power transmission or natural gas, nuclear fuel or other commodity transportation operations are unavailable or disrupted, the ability for subsidiaries of NEE, including FPL, to sell and deliver power or natural gas may be limited.
- NEE and FPL are subject to credit and performance risk from customers, hedging counterparties and vendors.
- NEE and FPL could recognize financial losses or a reduction in operating cash flows if a counterparty fails to perform or make payments in accordance with the terms of derivative contracts or if NEE or FPL is required to post margin cash collateral under derivative contracts.
- NEE and FPL are highly dependent on sensitive and complex information technology systems, and any failure or breach of those systems could have a material adverse effect on their business, financial condition, results of operations and prospects.
- NEE's and FPL's retail businesses are subject to the risk that sensitive customer data may be compromised, which could result in a material adverse impact to their reputation and/or have a material adverse effect on the business, financial condition, results of operations and prospects of NEE and FPL.
- NEE and FPL could recognize financial losses as a result of volatility in the market values of derivative instruments and limited liquidity in OTC markets.
- NEE and FPL may be materially adversely affected by negative publicity.
- NEE's and FPL's business, financial condition, results of operations and prospects may be adversely affected if FPL is unable to maintain, negotiate or renegotiate franchise agreements on acceptable terms with municipalities and counties in Florida.
- NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected by work strikes or stoppages and increasing personnel costs.
- NEE's ability to successfully identify, complete and integrate acquisitions is subject to significant risks, including, but not limited to, the effect of increased competition for acquisitions resulting from the consolidation of the energy industry.

Nuclear Generation Risks

- The operation and maintenance of NEE's and FPL's nuclear generation facilities involve environmental, health and financial risks that could result in fines or the closure of the facilities and in increased costs and capital expenditures.
- In the event of an incident at any nuclear generation facility in the U.S. or at certain nuclear generation facilities in Europe, NEE and FPL could be assessed significant retrospective assessments and/or retrospective insurance premiums as a result of their participation in a secondary financial protection system and nuclear insurance mutual

companies.

- NRC orders or new regulations related to increased security measures and any future safety requirements promulgated by the NRC could require NEE and FPL
 to incur substantial operating and capital expenditures at their nuclear generation facilities and/or result in reduced revenues.
- The inability to operate any of NEE's or FPL's nuclear generation units through the end of their respective operating licenses or planned license extensions could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.
- NEE's and FPL's nuclear units are periodically removed from service to accommodate planned refueling and maintenance outages, and for other purposes. If
 planned outages last longer than anticipated or if there are unplanned outages, NEE's and FPL's business, financial condition, results of operations and
 prospects could be materially adversely affected.

Liquidity, Capital Requirements and Common Stock Risks

- Disruptions, uncertainty or volatility in the credit and capital markets, among other factors, may negatively affect NEE's and FPL's ability to fund their liquidity and capital needs and to meet their growth objectives, and could also materially adversely affect their business, financial condition, liquidity, results of operations and prospects.
- Defaults or noncompliance related to project-specific, limited-recourse financing agreements of NEE's consolidated and unconsolidated subsidiaries could
 materially adversely affect NEE's business, financial condition, liquidity, results of operations and prospects, as well as the availability or terms of future
 financings for NEE or its subsidiaries.
- NEE's, NEECH's and FPL's inability to maintain their current credit ratings may materially adversely affect NEE's and FPL's liquidity and results of operations, limit the ability of NEE and FPL to grow their business, and increase interest costs.
- NEE's and FPL's liquidity may be impaired if their credit providers are unable to fund their credit commitments to the companies or to maintain their current credit ratings.
- Poor market performance and other economic factors could affect NEE's defined benefit pension plan's funded status, which may materially adversely affect NEE's and FPL's business, financial condition, liquidity, results of operations and prospects.
- Poor market performance and other economic factors could adversely affect the asset values of NEE's and FPL's nuclear decommissioning funds, which may
 materially adversely affect NEE's and FPL's business, financial condition, liquidity, results of operations and prospects.
- Certain of NEE's assets and investments are subject to changes in market value and other risks, which may materially adversely affect NEE's liquidity, financial
 condition and results of operations.
- NEE may be unable to meet its ongoing and future financial obligations and to pay dividends on its common stock if its subsidiaries are unable to pay upstream dividends or repay funds to NEE.
- NEE may be unable to meet its ongoing and future financial obligations and to pay dividends on its common stock if NEE is required to perform under guarantees of obligations of its subsidiaries.
- XPLR may not be able to access sources of capital on commercially reasonable terms, which would have a material adverse effect on its ability to consummate
 future acquisitions and on the value of NEE's limited partner interest in XPLR OpCo.
- Disruptions, uncertainty or volatility in the credit and capital markets may exert downward pressure on the market price of NEE's common stock.
- Widespread public health crises and epidemics or pandemics may have material adverse impacts on NEE's and FPL's business, financial condition, liquidity, results of operations and prospects.

These factors should be read together with the risk factors included in Part I, Item 1A Risk Factors in the 2024 Form 10-K, and investors should refer to that section of the 2024 Form 10-K. Any forward-looking statement speaks only as of the date on which such statement is made, and NEE and FPL undertake no obligation to update any forward-looking statement to reflect events or circumstances, including, but not limited to, unanticipated events, after the date on which such statement is made, unless otherwise required by law. New factors emerge from time to time and it is not possible for management to predict all of such factors, nor can it assess the impact of each such factor on the business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained or implied in any forward-looking statement.

Website Access to SEC Filings. NEE and FPL make their SEC filings, including the annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments to those reports, available free of charge on NEE's internet website, www.nexteraenergy.com, as soon as reasonably practicable after those documents are electronically filed with or furnished to the SEC. The information and materials available on NEE's website (or any of its subsidiaries' or affiliates' websites) are not incorporated by reference into this combined Form 10-Q.

The accompanying condensed consolidated financial statements should be read in conjunction with the 2024 Form 10-K. In the opinion of NEE and FPL management, all adjustments considered necessary for fair financial statement presentation have been made. All adjustments are normal and recurring unless otherwise noted. Certain amounts included in the prior year's condensed consolidated financial statements have been reclassified to conform to the current year's presentation. The results of operations for an interim period generally will not give a true indication of results for the year.

1. Revenue from Contracts with Customers

FPL and NEER generate substantially all of NEE's operating revenues, which primarily include revenues from contracts with customers, as well as derivative (see Note 2) and lease transactions at NEER. For the vast majority of contracts with customers, NEE believes that the obligation to deliver energy, capacity or transmission is satisfied over time as the customer simultaneously receives and consumes benefits as NEE performs. NEE's revenue from contracts with customers was approximately \$6.4 billion (\$4.7 billion at FPL) and \$6.0 billion (\$4.4 billion at FPL) for the three months ended June 30, 2025 and 2024, respectively, and \$12.3 billion (\$8.7 billion at FPL) for the six months ended June 30, 2025 and 2024, respectively NEE's and FPL's receivables are primarily associated with revenues earned from contracts with customers, as well as derivative and lease transactions at NEER, and consist of both billed and unbilled amounts, which are recorded in customer receivables and other receivables on NEE's and FPL's condensed consolidated balance sheets. Receivables represent unconditional rights to consideration and reflect the differences in timing of revenue recognition and cash collections. For substantially all of NEE's and FPL's receivables, regardless of the type of revenue transaction from which the receivable originated, customer and counterparty credit risk is managed in the same manner and the terms and conditions of payment are similar.

FPL – FPL's revenues are derived primarily from tariff-based sales that result from providing electricity to retail customers in Florida with no defined contractual term. Electricity sales to retail customers account for approximately 90% of FPL's operating revenues, the majority of which are to residential customers. FPL's retail customers receive a bill monthly based on the amount of monthly kWh usage with payment due monthly. For these types of sales, FPL recognizes revenue as electricity is delivered and billed to customers, as well as an estimate for electricity delivered and not yet billed. The billed and unbilled amounts represent the value of electricity delivered to the customer. At June 30, 2025 and December 31, 2024, FPL's unbilled revenues amounted to approximately \$831 million and \$573 million, respectively, and are included in customer receivables on NEE's and FPL's condensed consolidated balance sheets. Certain contracts with customers contain a fixed price with maturity dates through 2054. As of June 30, 2025, FPL expects to record approximately \$575 million of revenues related to the fixed price components of such contracts over the remaining terms of the related contracts. Certain of these contracts also contain a variable price component for energy usage which FPL recognizes as revenue as the energy is delivered based on rates stipulated in the respective contracts.

NEER – NEER's revenue from contracts with customers is derived primarily from the sale of energy commodities, electric capacity and electric transmission. For these types of sales, NEER recognizes revenue as energy commodities are delivered and as electric capacity and electric transmission are made available, consistent with the amounts billed to customers based on rates stipulated in the respective contracts as well as an accrual for amounts earned but not yet billed. The amounts billed and accrued represent the value of energy or transmission delivered and/or the capacity of energy or transmission available to the customer. Revenues yet to be earned under these contracts, which have maturity dates ranging from 2025 to 2055, will vary based on the volume of energy or transmission delivered and/or available. NEER's customers typically receive bills monthly with payment due within 30 days. Certain contracts with customers contain a fixed price which primarily relate to electric capacity sales through 2038 and certain power purchase agreements with maturity dates through 2036. As of June 30, 2025, NEER expects to record approximately \$700 million of revenues related to the fixed price components of such contracts over the remaining terms of the related contracts as the capacity is provided. The power purchase agreements also contain a variable price component for energy usage which NEER recognizes as revenue as the energy is delivered based on rates stipulated in the respective contracts.

2. Derivative Instruments

NEE and FPL use derivative instruments (primarily swaps, options, futures and forwards) to manage the physical and financial risks inherent in the purchase and sale of fuel and electricity, as well as interest rate and foreign currency exchange rate risk associated primarily with outstanding and expected future debt issuances and borrowings, and to optimize the value of NEER's power generation and natural gas and oil production assets. NEE and FPL do not utilize hedge accounting for their cash flow and fair value hedges.

With respect to commodities related to NEE's competitive energy business, NEER employs risk management procedures to conduct its activities related to optimizing the value of its power generation and natural gas and oil production assets, providing full energy and capacity requirements services primarily to distribution utilities, and engaging in power and fuel marketing and trading activities to take advantage of expected future favorable price movements and changes in the expected valuility of prices in the energy markets. These risk management activities involve the use of derivative instruments executed within prescribed limits to manage the risk associated with fluctuating commodity prices. Transactions in derivative instruments are executed on recognized exchanges or via the OTC markets, depending on the most favorable credit terms and market execution factors. For NEER's power generation and natural gas and oil production assets, derivative instruments are used to hedge all or a portion of the expected output of these assets. These hedges are designed to reduce the effect of adverse changes in the wholesale forward commodity markets associated with NEER's power generation and natural gas and oil production assets. With regard to full energy and capacity requirements services, NEER is required to vary the quantity of energy and related services based on the load demands of the customers served. For this type of transaction, derivative instruments are used to hedge the anticipated electricity quantities required to serve these customers and reduce the effect of unfavorable changes in the forward energy markets. Additionally, NEER takes positions in energy markets based on differences between actual forward market levels and management's view of fundamental market conditions, including supply/demand imbalances, changes in traditional flows of energy, changes in short- and long-term weather patterns and anticipated regulatory and legislative outcomes. NEER uses derivative instruments to realize value from th

Derivative instruments, when required to be marked to market, are recorded on NEE's and FPL's condensed consolidated balance sheets as either an asset or liability measured at fair value. At FPL, substantially all changes in the derivatives' fair value are deferred as a regulatory asset or liability until the contracts are settled, and, upon settlement, any gains or losses are passed through the fuel clause. For NEE's non-rate regulated operations, predominantly NEER, essentially all changes in the derivatives' fair value for power purchases and sales, fuel sales and trading activities are recognized on a net basis in operating revenues and the equity method investees' related activity is recognized in equity in earnings (losses) of equity method investees in NEE's condensed consolidated statements of income. Settlement gains and losses are included within the line items in the condensed consolidated statements of income to which they relate. Transactions for which physical delivery is deemed not to have occurred are presented on a net basis in the condensed consolidated statements of income. For commodity derivatives, NEE believes that, where offsetting positions exist at the same location for the same time, the transactions are considered to have been netted and therefore physical delivery has been deemed not to have occurred for financial reporting purposes. Settlements related to derivative instruments are substantially all recognized in net cash provided by operating activities in NEE's and FPL's condensed consolidated statements of cash flows.

For interest rate and foreign currency derivative instruments, all changes in the derivatives' fair value, as well as the transaction gain or loss on foreign denominated debt, are recognized in interest expense and the equity method investees' related activity is recognized in equity in earnings (losses) of equity method investees in NEE's condensed consolidated statements of income. At June 30, 2025, NEE's AOCI included immaterial amounts related to discontinued interest rate cash flow hedges with expiration dates through October 2033 and foreign currency cash flow hedges with expiration dates through September 2030.

Fair Value Measurements of Derivative Instruments – The fair value of assets and liabilities are determined using either unadjusted quoted prices in active markets (Level 1) or other pricing inputs that are observable (Level 2) whenever that information is available and using unobservable inputs (Level 3) to estimate fair value only when relevant observable inputs are not available. NEE and FPL use different valuation techniques to measure the fair value of assets and liabilities, relying primarily on the market approach of using prices and other market information for identical and/or similar assets and liabilities for those assets and liabilities that are measured at fair value on a recurring basis. NEE's and FPL's assessment of the significance of any particular input to the fair value measurement requires judgment and may affect placement within the fair value hierarchy levels. Non-performance risk, including the consideration of a credit valuation adjustment, is also considered in the determination of fair value for all assets and liabilities measured at fair value.

NEE and FPL measure the fair value of commodity contracts using a combination of market and income approaches utilizing prices observed on commodities exchanges and in the non-exchange traded markets, or through the use of industry-standard valuation techniques, such as option modeling or discounted cash flows techniques, incorporating both observable and unobservable valuation inputs. The resulting measurements are the best estimate of fair value as represented by the transfer of the asset or liability through an orderly transaction in the marketplace at the measurement date.

Exchange-traded derivative assets and liabilities are valued using observable settlement prices from the exchanges and are classified as Level 1 or Level 2, depending on whether positions are in active or inactive markets.

NEE, through its subsidiaries, including FPL, also enters into non-exchange traded commodity derivatives. The majority of the valuation inputs are observable using exchange-quoted prices.

NEE, through NEER, also enters into full requirements contracts, which, in most cases, meet the definition of derivatives and are measured at fair value. These contracts typically have one or more inputs that are not observable and are significant to the valuation of the contract. In addition, certain non-exchange traded derivative options at NEE have one or more significant inputs that are not observable, and are valued using industry-standard option models.

In all cases where NEE and FPL use significant unobservable inputs for the valuation of a commodity contract, consideration is given to the assumptions that market participants would use in valuing the asset or liability. The primary input to the valuation models for commodity contracts is the forward commodity curve for the respective instruments. Other inputs include, but are not limited to, assumptions about market liquidity, volatility, correlation and contract duration as more fully described below in Significant Unobservable Inputs Used in Recurring Fair Value Measurements. In instances where the reference markets are deemed to be inactive or do not have transactions for a similar contract, the derivative assets and liabilities may be valued using significant other observable inputs and potentially significant unobservable inputs. In such instances, the valuation for these contracts is established using techniques including extrapolation from or interpolation between actively traded contracts, or estimated basis adjustments from liquid trading points. NEE and FPL regularly evaluate and validate the inputs used to determine fair value by a number of methods, consisting of various market price verification procedures, including the use of pricing services and broker quotes to support the market price of the various commodities. Where there are assumptions and models used to generate inputs for valuing derivative assets and liabilities, the review and verification of the assumptions and models are undertaken by individuals in an independent control function.

NEE uses interest rate contracts and foreign currency contracts to mitigate and adjust interest rate and foreign currency exchange exposure related primarily to certain outstanding and expected future debt issuances and borrowings when deemed appropriate based on market conditions or when required by financing agreements. NEE estimates the fair value of these derivatives using an income approach based on a discounted cash flows valuation technique utilizing the net amount of estimated future cash inflows and outflows related to the agreements.

The tables below present NEE's and FPL's gross derivative positions at June 30, 2025 and December 31, 2024, as required by disclosure rules. However, the majority of the underlying contracts are subject to master netting agreements and generally would not be contractually settled on a gross basis. Therefore, the tables below also present the derivative positions on a net basis, which reflect the offsetting of positions of certain transactions within the portfolio, the contractual ability to settle contracts under master netting arrangements and the netting of margin cash collateral, as well as the location of the net derivative position on the condensed consolidated balance sheets.

Includes the effect of the contractual ability to settle contracts under master netting arrangements and the netting of margin cash collateral payments and receipts. NEE and FPL also have contract settlement receivable and payable balances that are subject to the master netting arrangements but are not offset within the condensed consolidated balance sheets and are recorded in customer receivables – net and accounts payable, respectively.

Reflects the netting of approximately \$154 million in margin cash collateral received from counterparties.

Reflects the netting of approximately \$321 million in margin cash collateral received from counterparties.

At June 30, 2025 and December 31, 2024, NEE had approximately \$35 million (\$4 million at FPL) and \$47 million (\$2 million at FPL), respectively, in margin cash collateral received from counterparties that was not offset against derivative assets in the above presentation. These amounts are included in current other liabilities on NEE's condensed consolidated balance sheets. Additionally, at June 30, 2025 and December 31, 2024, NEE had approximately \$93 million (none at FPL) and \$58 million (none at FPL), respectively, in margin cash collateral paid to counterparties that was not offset against derivative assets or liabilities in the above presentation. These amounts are included in current other assets on NEE's condensed consolidated balance sheets.

Significant Unobservable Inputs Used in Recurring Fair Value Measurements - The valuation of certain commodity contracts requires the use of significant unobservable inputs. All forward price, implied volatility, implied correlation and interest rate inputs used in the valuation of such contracts are directly based on third-party market data, such as broker quotes and exchange settlements, when that data is available. If third-party market data is not available, then industry standard methodologies are used to develop inputs that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. Observable inputs, including some forward prices, implied volatilities and interest rates used for determining fair value are updated daily to reflect the best available market information. Unobservable inputs which are related to observable inputs, such as illiquid portions of forward price or volatility curves, are updated daily as well, using industry standard techniques such as interpolation and extrapolation, combining observable forward inputs supplemented by historical market and other relevant data. Other unobservable inputs, such as implied correlations, block-to-hourly price shaping, customer migration rates from full

requirements contracts and some implied volatility curves, are modeled using proprietary models based on historical data and industry standard techniques.

The significant unobservable inputs used in the valuation of NEE's commodity contracts categorized as Level 3 of the fair value hierarchy at June 30, 2025 are as follows:

Transaction Type	 	/alue at 30, 2025	i	Valuation Technique(s)	Significant Unobservable Inputs		Rang	е	Weighted- average(a)
	 Assets		ilities						
Forward contracts – power	\$ (Mil 518	llions) \$	400	Discounted cash flow	Forward price (per MWh)	\$(4)	_	\$251	\$53
Forward contracts – gas	330		139	Discounted cash flow	Forward price (per MMBtu)	\$1	_	\$13	\$4
Forward contracts – congestion	40		22	Discounted cash flow	Forward price (per MWh)	\$(57)	_	\$20	\$1
Options – power	21		2	Option models	Implied correlations	69%	_	81%	71%
					Implied volatilities	37%	_	358%	81%
Options – primarily gas	99		128	Option models	Implied correlations	56%	_	100%	90%
					Implied volatilities	17%	_	145%	49%
Full requirements and unit contingent	354		144	Discounted cash flow	Forward price (per MWh)	\$17	_	\$312	\$83
contracts					Customer migration rate(b)	%	_	21%	1%
Forward contracts – other	281		251						
Total	\$ 1,643	\$	1,086						

⁽a) Unobservable inputs were weighted by volume.(b) Applies only to full requirements contracts.

(b) Applied Gilly to Full requirements contracte.

The sensitivity of NEE's fair value measurements to increases (decreases) in the significant unobservable inputs is as follows:

Significant Unobservable Input	Position	Impact on Fair Value Measurement
Forward price	Purchase power/gas	Increase (decrease)
	Sell power/gas	Decrease (increase)
Implied correlations	Purchase option	Decrease (increase)
	Sell option	Increase (decrease)
Implied volatilities	Purchase option	Increase (decrease)
	Sell option	Decrease (increase)
Customer migration rate	Sell pow er(a)	Decrease (increase)

⁽a) Assumes the contract is in a gain position.

The reconciliation of changes in the fair value of derivatives that are based on significant unobservable inputs is as follows:

			Three Months E	inded .	June 30,

Foreign currency contracts	(1)		(1)		(1)		_
Total	\$ (70)	\$	(187)	\$	(695)	\$	393

⁽a) For the three and six months ended June 30, 2025, FPL recorded losses of approximately \$137 million and \$105 million, respectively, related to commodity contracts as regulatory assets on its condensed consolidated balance sheets. For the three and six months ended June 30, 2024, FPL recorded gains of approximately \$72 million and \$53 million, respectively, related to commodity contracts as regulatory liabilities on its condensed consolidated balance sheets.

Notional Volumes of Derivative Instruments – The following table represents net notional volumes associated with derivative instruments that are required to be reported at fair value in NEE's and FPL's condensed consolidated financial statements. The table includes significant volumes of transactions that have minimal exposure to commodity price changes because they are variably priced agreements. These volumes are only an indication of the commodity exposure that is managed through the use of derivatives. They do not represent net physical asset positions or non-derivative positions and the related hedges, nor do they represent NEE's and FPL's net economic exposure, but only the net notional derivative positions that fully or partially hedge the related asset positions. NEE and FPL had derivative commodity contracts for the following net notional volumes:

	June	30, 2025	December	r 31, 2024
Commodity Type	NEE	FPL	NEE	FPL
		(milli	ons)	_
Power	(216) MWh	-	(189) MMh	_
Natural gas	(772) MMBtu	473 MMBtu	(1,131) MMBtu	503 MMBtu
Oil	(19) barrels	-	(25) barrels	_

At June 30, 2025 and December 31, 2024, NEE had interest rate contracts with a net notional amount of approximately \$45.2 billion and \$35.2 billion, respectively, and foreign currency contracts with a notional amount of approximately \$3.2 billion and \$1.2 billion, respectively.

Credit-Risk-Related Contingent Features – Certain derivative instruments contain credit-risk-related contingent features including, among other things, the requirement to maintain an investment grade credit rating from specified credit rating agencies and certain financial ratios, as well as credit-related cross-default and material adverse change triggers. At June 30, 2025 and December 31, 2024, the aggregate fair value of NEE's derivative instruments with credit-risk-related contingent features that were in a liability position was approximately \$4.3 billion (\$64 million for FPL) and \$3.8 billion (\$11 million for FPL), respectively.

If the credit-risk-related contingent features underlying these derivative agreements were triggered, certain subsidiaries of NEE, including FPL, could be required to post collateral or settle contracts according to contractual terms which generally allow netting of contracts in offsetting positions. Certain derivative contracts contain multiple types of credit-related triggers. To the extent these contracts contain a credit ratings downgrade trigger, the maximum exposure is included in the following credit ratings collateral posting requirements. If FPL's and NEECH's credit ratings were downgraded to BBB/Baa2 (a three-level downgrade for FPL and a one level downgrade for NEECH from the current lowest applicable rating), applicable NEE subsidiaries would be required to post collateral such that the total posted collateral would be approximately \$395 million (\$45 million at FPL) at June 30, 2025 and \$500 million (none at FPL) at December 31, 2024. If FPL's and NEECH's credit ratings were downgraded to below investment grade, applicable NEE subsidiaries would be required to post additional collateral such that the total posted collateral would be approximately \$2.5 billion (\$75 million at FPL) at June 30, 2025 and \$2.4 billion (\$25 million at FPL) at December 31, 2024. Some derivative contracts do not contain credit ratings downgrade triggers, but do contain provisions that require certain financial measures be maintained and/or have credit-related cross-default triggers. In the event these provisions

were triggered, applicable NEE subsidiaries could be required to post additional collateral of up to approximately \$2.0 billion (\$105 million at FPL) at June 30, 2025 and \$1.4 billion (\$70 million at FPL) at December 31, 2024.

Collateral related to derivatives, including amounts posted for margin, current exposures and future performance with exchanges and independent system operators, may be posted in the form of cash or credit support in the normal course of business. At June 30, 2025 and December 31, 2024, applicable NEE subsidiaries have posted approximately \$179 million (none at FPL) and \$19 million (none at FPL), respectively, in cash, and \$1,307 million (none at FPL) and \$1,334 million (none at FPL), respectively, in the form of letters of credit and surety bonds, each of which could be applied toward the collateral requirements described above. FPL and NEECH have capacity under their credit facilities generally in excess of the collateral requirements described above that would be available to support, among other things, derivative activities. Under the terms of the credit facilities, maintenance of a specific credit rating is not a condition to drawing on these credit facilities, although there are other conditions to drawing on these credit facilities.

Additionally, some contracts contain certain adequate assurance provisions whereby a counterparty may demand additional collateral based on subjective events and/or conditions. Due to the subjective nature of these provisions, NEE and FPL are unable to determine an exact value for these items and they are not included in any of the quantitative disclosures above.

3. Non-Derivative Fair Value Measurements

Non-derivative fair value measurements consist of NEE's and FPL's cash equivalents and restricted cash equivalents, special use funds and other investments. The fair value of these financial assets is determined by using the valuation techniques and inputs as described in Note 2 – Fair Value Measurements of Derivative Instruments as well as below.

Cash Equivalents and Restricted Cash Equivalents – NEE and FPL hold investments primarily in money market funds. The fair value of these funds is estimated using a market approach based on current observable market prices.

Special Use Funds and Other Investments – NEE and FPL hold primarily debt and equity securities directly, as well as indirectly through commingled funds. Substantially all directly held equity securities are valued at their quoted market prices. For directly held debt securities, multiple prices and price types are obtained from pricing vendors whenever possible, which enables cross-provider validations. A primary price source is identified based on asset type, class or issue of each security. Commingled funds, which are similar to mutual funds, are maintained by banks or investment companies and hold certain investments in accordance with a stated set of objectives. The fair value of commingled funds is primarily derived from the quoted prices in active markets of the underlying securities. Because the fund shares are offered to a limited group of investors, they are not considered to be traded in an active market.

Fair Value Measurement Alternative – NEE holds investments in equity securities without readily determinable fair values, which are initially recorded at cost, of approximately \$642 million and \$665 million at June 30, 2025 and December 31, 2024, respectively, and are included in noncurrent other assets on NEE's condensed consolidated balance sheets. Adjustments to carrying values are recorded as a result of observable price changes in transactions for identical or similar investments of the same issuer.

Recurring Non-Derivative Fair Value Measurements – NEE's and FPL's financial assets and other fair value measurements made on a recurring basis by fair value hierarchy level are as follows:

	June 30, 2025								
	 evel 1	L	evel 2	L	evel 3		Total

Includes restricted cash equivalents of approximately \$109 million (\$101 million for FPL) in current other assets on the condensed consolidated balance sheets.

Excludes investments accounted for under the equity method and loans not measure at fair value on a recurring basis. See Fair Value of Financial Instruments Recorded at Other than Fair Value below. Primarily invested in commingled funds whose underlying securities would be Level 1 if those securities were held directly by NEE or FPL. Included in noncurrent other assets on NEE's and FPL's condensed consolidated balance sheets.

Fair Value of Financial Instruments Recorded at Other than Fair Value – The carrying amounts of commercial paper and other short-term debt approximate their fair values. The carrying amounts and estimated fair values of other financial instruments recorded at other than fair value are as follows:

	June :	30, 2025		Decembe	er 31, 202	24	
	arrying Mount		Estimated Fair Value		Carrying Amount		Estimated Fair Value
			ons)				
NEE:							
Special use funds(a)	\$ 1,424	\$	1,425	\$	1,342	\$	1,343
Other receivables, net of allowances(b)	\$ 610	\$	610	\$	629	\$	629
Long-term debt, including current portion	\$ 88,395	\$	85,699 ^(c)	\$	80,446	\$	76,428 ^(c)
FPL:							
Special use funds(a)	\$ 941	\$	941	\$	915	\$	916
Long-term debt, including current portion	\$ 27.602	\$	26.081 ^(c)	\$	26.745	\$	24.718 ^(c)

Primarily represents investments accounted for under the equity method and loans not measured at fair value on a recurring basis (Level 2).

Approximately \$367 million and \$396 million is included in current other assets and \$243 million and \$233 million is included in noncurrent other assets on NEEs condensed consolidated balance sheets at June 30, 2025 and December 31, 2024, respectively (primarily Level 3).

At June 30, 2025 and December 31, 2024, substantially all is Level 2 for NEE and FPL

Special Use Funds and Other Investments Carried at Fair Value – The special use funds noted above and those carried at fair value (see Recurring Non-Derivative Fair Value Measurements above) consist primarily of NEE's nuclear decommissioning fund assets of approximately \$10,231 million (\$7,192 million for FPL) and \$9,799 million (\$6,874 million for FPL) at June 30, 2025 and December 31, 2024, respectively. The investments held in the special use funds and other investments consist of equity and available for sale debt securities which are primarily carried at estimated fair value. The amortized cost of debt securities is approximately \$3,941 million (\$1,799 million for FPL) and \$3,720 million (\$1,780 million for FPL) at June 30, 2025 and December 31, 2024, respectively. Debt securities included in the nuclear decommissioning funds have a weighted-average maturity at June 30, 2025 of approximately eight years at NEE and nine years at FPL. Other investments primarily consist of debt securities with a weighted-average maturity at June 30, 2025 of approximately eight years. The cost of securities sold is determined using the specific identification method

For FPL's special use funds, changes in fair value of debt and equity securities, including any estimated credit losses of debt securities, result in a corresponding adjustment to the related regulatory asset or liability accounts, consistent with regulatory treatment. For NEE's non-rate regulated operations, changes in fair value of debt securities result in a corresponding adjustment to OCI, except for estimated credit losses and unrealized losses on debt securities intended or required to be sold prior to recovery of the amortized cost basis, which are recognized in other – net in NEE's condensed consolidated statements of income. Changes in fair value of equity securities are primarily recorded in change in unrealized gains (losses) on equity securities held in NEER's nuclear decommissioning funds – net in NEE's condensed consolidated statements of income.

Unrealized gains recognized on equity securities held at June 30, 2025 and 2024 are as follows:

						FPL									
	Thre	Three Months Ended June 30, Six Months Ended June 30, Three Months Ended June 30, Six			Three Months Ended June 30,			Six Months E	nded	June 30,					
		2025	2024		2025		2024	2	025		2024		2025		2024
							(milli	ions)							
Unrealized gains	\$	539	\$ 114	\$	297	\$	530	\$	374	\$	88	\$	202	\$	382

Realized gains and losses and proceeds from the sale or maturity of available for sale debt securities are as follows:

		NEE .								FPL											
	Thre	ree Months Ended June 30,				Six Months E	June 30,	Th	ree Months	Ende	ed June 30,	5	Six Months E	nded	June 30,

The unrealized gains and unrealized losses on available for sale debt securities and the fair value of available for sale debt securities in an unrealized loss position are as follows:

	N	Œ		FRL							
	 June 30, 2025		December 31, 2024		June 30, 2025		December 31, 2024				
			(mill	ions)							
Unrealized gains	\$ 51	\$	25	\$	31	\$	16				
Unrealized losses(a)	\$ 82	\$	119	\$	41	\$	61				
Fair value	\$ 1,274	\$	2,224	\$	673	\$	1,160				

⁽a) Unrealized losses on a vailable for sale debt securities in an unrealized loss position for greater than twelve months at June 30, 2025 and December 31, 2024 were not material to NEE or FPL.

Regulations issued by the FERC and the NRC provide general risk management guidelines to protect nuclear decommissioning funds and to allow such funds to earn a reasonable return. The FERC regulations prohibit, among other investments, investments in any securities of NEE or its subsidiaries, affiliates or associates, excluding investments tied to market indices or mutual funds. Similar restrictions applicable to the decommissioning funds for NEER's nuclear plants are included in the NRC operating licenses for those facilities or in NRC regulations applicable to NRC licensees not in cost-of-service environments. With respect to the decommissioning fund for Seabrook, decommissioning fund contributions and withdrawals are also regulated by the New Hampshire Nuclear Decommissioning Financing Committee pursuant to New Hampshire law.

The nuclear decommissioning reserve funds are managed by investment managers who must comply with the guidelines of NEE and FPL and the rules of the applicable regulatory authorities. The funds' assets are invested giving consideration to taxes, liquidity, risk, diversification and other prudent investment objectives.

Nonrecurring Fair Value Measurements – NEE tests its equity method investments for impairment whenever events or changes in circumstances indicate that the fair value of the investment is less than the carrying value. Indicators of impairment may include, among other things, an observable market price below NEE's carrying value. Investments that are OTTI are written down to their estimated fair value on the reporting date and an impairment loss is recognized.

NextEra Energy Resources owns a noncontrolling interest in XPLR, primarily through its limited partner interest in XPLR OpCo, and accounts for this ownership interest as an equity method investment. During the preparation of NEE's March 31, 2025 financial statements, it was determined that NextEra Energy Resources' investment in XPLR was OTTI as a result of a significant decline in trading price of XPLR's common units following XPLR's announcement of a strategic repositioning, including suspension of the distribution to common unitholders for an indefinite period. The impairment reflected NEE's fair value analysis using the market approach and the observable trading price of XPLR's common units at March 31, 2025 of \$9.50. When making the OTTI determination, NEE considered, among other things, the extent to which the publicly traded unit price was less than cost. Based on the fair value analysis, the equity method investment with a carrying amount of approximately \$1.7 billion was written down to its estimated fair value of \$1.0 billion, resulting in an impairment charge of \$0.7 billion (\$0.5 billion after tax), which is reflected in equity in earnings (losses) of equity method investees in NEE's condensed consolidated statements of income for the six months ended June 30, 2025. Should NEE determine, based on future analysis which includes the current and future trading prices of XPLR's common units, that an additional impairment is other-than-temporary, an impairment loss would be recorded, which would impact NEE's condensed consolidated statements of income.

4. Income Taxes

NEE's effective income tax rate is based on the composition of pretax income or loss, which, for the six months ended June 30, 2025, reflects the impact from an impairment charge related to the investment in XPLR (see Note 3 – Nonrecurring Fair Value Measurements).

Areconciliation between the effective income tax rates and the applicable statutory rate is as follows:

	NEE		FPL		NEE		FPL	
	Three Months End	ded June 30,	Three Months End	ded June 30,	Six Months Ende	ed June 30,	Six Months Ende	ed June 30,
	2025	2024	2025	2024	2025	2024	2025	2024

Effective income tax rate	(18.5)%	(5.2)%	11.4 %	17.3 %	(58.6)%	4.8 %	12.8 %	18.2 %

NEE recognizes PTCs as wind and solar energy is generated and sold based on a per kWh rate prescribed in applicable federal and state statutes, which may differ significantly from amounts computed, on a quarterly basis, using an overall effective income tax rate anticipated for the full year. NEE uses this method of recognizing PTCs for specific reasons, including that PTCs are an integral part of the expected value of most wind and some solar projects and a fundamental component of such wind and solar projects results of operations. PTCs, as well as ITCs, can significantly affect NEE's effective income tax rate depending on the amount of pretax income or loss. The amount of PTCs recognized can be significantly affected by wind and solar generation and by the roll off of PTCs after ten years of production absent a repowering of the wind and solar projects.

On July 4, 2025, the One Big Beautiful Bill Act (OBBBA) was signed into law which, among other things, modified tax legislation affecting clean energy tax credits, bonus depreciation rules, and tax treatment of research and development expenses and interest deductions. Specifically, the OBBBA provides for 100% bonus depreciation with no phase-out for unregulated property acquired after January 19, 2025, 100% expensing with no phase-out of domestic research and development expenses incurred in taxable years beginning after 2024, and the use of earnings before income taxes, depreciation and amortization (EBITDA), rather than earnings before income taxes (EBITD, with no phase-out for purposes of calculating the interest limitation for taxable years beginning after 2024. The OBBBA did not change the federal corporate income tax rate and did not require remeasurement of deferred tax assets or liabilities. NEE determined that the OBBBA had no impact to NEE's condensed consolidated financial statements for the three and six months ended June 30, 2025.

5. Related Party Transactions

Through XPLR OpCo, XPLR owns, or has a partial ownership interest in, a portfolio of contracted renewable energy assets consisting of wind, solar and battery storage projects as well as a contracted natural gas pipeline. NEE has an approximately 52.5% noncontrolling interest in XPLR, primarily through its limited partner interest in XPLR OpCo, and accounts for its ownership interest in XPLR as an equity method investment. NextEra Energy Resources operates essentially all of the energy projects owned by XPLR and provides services to XPLR under various related party operations and maintenance, development and construction, administrative and management services agreements (service agreements). Under these service agreements, NextEra Energy Resources incurred costs of approximately \$214 million and \$68 million during the three months ended June 30, 2025 and 2024, respectively, primarily in connection with wind repowering, which will be reimbursed by XPLR. NextEra Energy Resources is also party to a CSCS agreement with a subsidiary of XPLR. At June 30, 2025 and December 31, 2024, the cash sweep amounts (due to XPLR and its subsidiaries) held in accounts belonging to NextEra Energy Resources or its subsidiaries were approximately \$16 million and \$127 million, respectively, and are included in accounts payable. Amounts due from XPLR of approximately \$598 million and \$159 million are included in other receivables and \$131 million and \$128 million are included in noncurrent other assets at June 30, 2025 and December 31, 2024, respectively. NEECH or NextEra Energy Resources guaranteed or provided indemnifications, letters of credit or surety bonds totaling approximately \$1.7 billion at June 30, 2025 primarily related to obligations on behalf of XPLR's subsidiaries with maturity dates ranging from 2025 to 2063, including certain project performance obligations and obligations under financing and interconnection agreements. Payment guarantees and related contracts with respect to unconsolidated entities for which NEE or o

During 2025 and 2024, certain services, primarily engineering, construction, transportation, storage and maintenance services, were provided to subsidiaries of NEE by related parties that NEE accounts for under the equity method of accounting. Charges for these services amounted to approximately \$234 million and \$181 million for the three months ended June 30, 2025 and 2024, respectively, and \$454 million and \$333 million for the six months ended June 30, 2025 and 2024, respectively.

6. Variable Interest Entities

NEER – At June 30, 2025, NEE consolidates a number of VIEs within the NEER segment. Subsidiaries within the NEER segment are considered the primary beneficiary of these VIEs since they control the most significant activities of these VIEs, including operations and maintenance, and they have the obligation to absorb expected losses of these VIEs.

Six indirect subsidiaries of NextEra Energy Resources have an ownership interest ranging from approximately 50% to 67% in entities which own and operate solar generation facilities with generating capacity of approximately 488 MW. Each of the subsidiaries is considered a ME since the non-managing members have no substantive rights over the managing members, and is consolidated by NextEra Energy Resources. These entities sell their electric output to third parties under power sales contracts with expiration dates ranging from 2031 through 2052. These entities have third-party debt which is secured by liens against the assets of the entities. The debt holders have no recourse to the general credit of NextEra Energy Resources for the repayment of debt. The assets and liabilities of these VIEs were approximately \$973 million and \$436 million, respectively, at June 30, 2025. There were eight of these consolidated VIEs at December 31, 2024 and the assets and liabilities of those VIEs at such date totaled approximately \$1,708 million and \$520 million, respectively. At June 30, 2025 and December 31, 2024, the assets and liabilities of these VIEs consisted primarily of property, plant and equipment and long-term debt.

NextEra Energy Resources consolidates a VIE which has a 10% direct ownership interest in wind and solar generation facilities which have the capability of producing approximately 400 MW and 599 MW, respectively. These entities sell their electric output under power sales contracts to third parties with expiration dates ranging from 2025 through 2040. These entities are also considered a VIE because the holders of differential membership interests in these entities do not have substantive rights over the significant activities of these entities. The assets and liabilities of the VIE were approximately \$1,334 million and \$78 million, respectively, at June 30, 2025, and \$1,346 million and \$76 million, respectively, at December 31, 2024. At June 30, 2025 and December 31, 2024, the assets of this VIE consisted primarily of property, plant and equipment.

NextEra Energy Resources consolidates 29 VIEs that primarily relate to certain subsidiaries which have sold differential membership interests in entities which own and operate wind generation, solar generation and battery storage facilities with generating/storage capacity of approximately 10,634 MW, 3,585 MW and 2,149 MW, respectively, and own wind generation and battery storage facilities that, upon completion of construction, which is anticipated in 2025, are expected to have generating/storage capacity of approximately 24 MW and 475 MW, respectively. These entities sell, or will sell, their electric output either under power sales contracts to third parties with expiration dates ranging from 2025 through 2054 or in the spot market. These entities are considered VIEs because the holders of differential membership interests do not have substantive rights over the significant activities of these entities. NextEra Energy Resources has financing obligations with respect to these entities, including third-party debt which is secured by liens against the generation facilities and the other assets of these entities or by pledges of NextEra Energy Resources' ownership interest in these entities. The debt holders have no recourse to the general credit of NextEra Energy Resources for the repayment of debt. The assets and liabilities of these VIEs totaled approximately \$24,875 million and \$916 million, respectively, at June 30, 2025. There were 30 of these consolidated VIEs at December 31, 2024 and the assets and liabilities of those VIEs at such date totaled approximately \$23,902 million and \$1,546 million, respectively. At June 30, 2025 and December 31, 2024, the assets of these VIEs consisted primarily of property, plant and equipment, and as of December 31, 2024, the liabilities of these VIEs consisted primarily of accounts payable.

Other – At June 30, 2025 and December 31, 2024, several NEE subsidiaries had investments totaling approximately \$6,160 million (\$4,730 million at FPL) and \$5,848 million (\$4,506 million at FPL), respectively, which are included in special use funds and noncurrent other assets on NEE's condensed consolidated balance sheets and in special use funds on FPL's condensed consolidated balance sheets. These investments represented primarily commingled funds and asset-backed securities. NEE subsidiaries, including FPL, are not the primary beneficiaries and therefore do not consolidate any of these entities because they do not control any of the ongoing activities of these entities, were not involved in the initial design of these entities and do not have a controlling financial interest in these entities.

Certain subsidiaries of NEE have noncontrolling interests in entities accounted for under the equity method, including NEE's noncontrolling interest in XPLR OpCo (see Note 5). These entities are limited partnerships or similar entity structures in which the limited partners or non-managing members do not have substantive rights over the significant activities of these entities, and therefore are considered VIEs. NEE is not the primary beneficiary because it does not have a controlling financial interest in these entities, and therefore does not consolidate any of these entities. NEE's investment in these entities totaled approximately \$2,592 million and \$3,315 million at June 30, 2025 and December 31, 2024, respectively. At June 30, 2025, subsidiaries of NEE had guarantees related to certain obligations of one of these entities, as well as commitments to invest an additional approximately \$165 million in several of these entities. See further discussion of such guarantees and commitments in Note 11 – Commitments and – Contracts, respectively.

7. Employee Retirement Benefits

NEE sponsors a qualified noncontributory defined benefit pension plan for substantially all employees of NEE and its subsidiaries and sponsors a contributory postretirement plan for other benefits for retirees of NEE and its subsidiaries meeting certain eligibility requirements.

The components of net periodic cost (income) for the plans are as follows:

		Pension	Ben	efits		Postretiren	Benefits		Pension	Ben	nefits	Postretirement Benefit				enefits		
	Thre	ee Months	Ende	ed June 30,	7	Three Months	End	led June 30,		Six Months E	nded	d June 30,		Six Months	- En	Ended June 30,		
		2025		2024		2025		2024	2025			2024		2025	25		2024	
								(milli	ions)

Net periodic cost (income) at N⊞	\$	(53)	\$	(51)	\$	3	\$	3	\$	(105)	\$	(74)	\$	5	<u>. </u>	\$	5	
Net periodic cost (income) allocated to FPL	\$	(30)	\$	(31)	\$	2	\$	2	\$	(60)	\$	(40)	\$	4	<u>. </u>	\$	4	

⁽a) Reflects enhanced early retirement benefit

8. Debt

Significant long-term debt issuances and borrowings during the six months ended June 30, 2025 were as follows:

	 ipal Amount millions)	Interest Rate		Maturity Date
FRL:				
First mortgage bonds	\$ 2,000	5.30 % -	5.80 %	2034 - 2065
NEECH:				
Debentures – fixed	\$ 4,500	4.85 % -	5.90 %	2028 - 2055
Debentures – variable	\$ 500		Variable (a)	2028
Junior subordinated debentures – variable	\$ 2,500	6.38 % -	6.50 % ^(b)	2055
Junior subordinated debentures – fixed	\$ 875		6.50 %	2085
Australian dollar denominated subordinated notes(c)	\$ 506		Variable (d)	2055
Canadian dollar denominated debentures(c)	\$ 1,463	3.83 % -	4.67 %	2030 – 2035

Variable rate is based on an underlying index plus a specified margin.
Two series of junior subordinated debentures were issued in February 2025 and will bear interest at the stated rates until August 15, 2030 and August 15, 2035, respectively, and thereafter will bear interest based on an underlying index plus a specified margin, reset every five y eyers, provided that the interest rate will not reset below the respective initial interest rates.
Foreign currency swaps have been entered into with respect to these debt issuances. See Note 2.
Two series of subordinated notes were issued in June 2025. One series will initially bear interest at 6.04% until June 17, 2030 and thereafter will bear interest based on an underlying index plus a specified margin. Both series will have an interest rate adjustment on June 17, 2035 and June 17, 2050 based on an underlying index plus a specified margin.

9. Equity

Earnings Per Share - The reconciliation of NEE's basic and diluted earnings per share attributable to NEE is as follows:

	Three Months	Ended June 30,		Six Months En	nded .	June 30,
	2025	2024		2025		2024
		(millions, exc	ept pe	er share amounts)		
Numerator – net income attributable to NEE	\$ 2,028	\$ 1,6	22	\$ 2,862	\$	3,890
Denominator:						
Weighted-average number of common shares outstanding – basic	2,056.7	2,05	.5	2,056.1		2,052.0
Equity units, stock options, performance share awards, restricted stock and exchangeable notes ^{a)}	4.6		.7	4.9		4.7
Weighted-average number of common shares outstanding – assuming dilution	2,061.3	2,05	.2	2,061.0		2,056.7
Eamings per share attributable to NEE:						
Basic	\$ 0.99	\$ 0	79	\$ 1.39	\$	1.90
Assuming dilution	\$ 0.98	\$ 0	79	\$ 1.39	\$	1.89

Calculated primarily using the treasury stock method. Performance share awards are included in diluted weighted-average number of common shares outstanding based upon what would be issued if the end of the reporting period was the end of the term of the award.

Common shares issuable pursuant to equity units, stock options, performance share awards and/or exchangeable notes, as well as restricted stock which were not included in the denominator above due to their antidilutive effect were approximately 72.9 million and 34.8 million for the three months ended June 30, 2025 and 2024, respectively, and 72.6 million and 34.2 million for the six months ended June 30, 2025 and 2024, respectively.

10. Summary of Significant Accounting and Reporting Policies

FPL 2021 Rate Agreement – In March 2024, the FPSC issued a supplemental final order regarding FPL's 2021 rate agreement. The order affirmed the FPSC's prior approval of the 2021 rate agreement and is intended to further document, as requested by the Florida Supreme Court, how the evidence presented led to and supports the FPSC's decision to approve FPL's 2021 rate agreement. In April 2024, Florida Rising, Inc., Environmental Confederation of Southwest Florida, Inc. and League of United Latin American Citizens of Florida (collectively, the appellants) submitted a notice of appeal to the Florida Supreme Court regarding the FPSC's supplemental final order. In July 2025, the Florida Supreme Court affirmed the FPSC's final and supplemental final order.

FPL 2025 Base Rate Proceeding – On February 28, 2025, FPL filed a petition with the FPSC requesting, among other things, approval of a four-year base rate plan that would begin in January 2026 (proposed four-year rate plan) replacing the current base rate settlement agreement that has been in place since 2022 (2021 rate agreement). The proposed four-year rate plan consists of, among other things: (i) an increase to base annual revenue requirements of approximately \$1,545 million effective January 2026; (ii) an increase to base annual revenue requirements of \$927 million effective January 2027; and (iii) a Solar and Battery Base Rate Adjustment mechanism to recover, subject to FPSC review, the revenue requirements associated with the cost of building and operating an additional 1,490 MW of solar and 596 MW of battery storage projects in 2029. The plan also requests a non-cash tax adjustment mechanism, which would operate in a similar manner to the non-cash depreciation reserve surplus mechanisms that were integral to FPL's prior multi-year rate settlements, as well as a storm cost recovery mechanism and a process to address potential tax law changes, which were included in the 2021 rate agreement. Under this proposed four-year rate plan, FPL commits that if its requested base rate adjustments are approved, it will not request additional general base rate increases that would be effective before January 2030. FPL's requested increases are based on a regulatory ROE of 11.90% on its retail rate base and continuation of FPL's regulatory capital structure, including its longstanding equity ratio approved in prior base rate cases. Accompanying FPL's petition are the testimony and exhibits of FPL's witnesses and the FPSC's required schedules supporting the 2026 and 2027 general base rate increases and charges. Technical hearings on the base rate proceeding are scheduled during the third quarter of 2025 and a final decision is expected in the fourth quarter of 2025.

Restricted Cash – At June 30, 2025 and December 31, 2024, NEE had approximately \$254 million (\$40 million for FPL) and \$159 million (\$101 million for FPL), respectively, of restricted cash, which, at December 31, 2024, was offset by \$244 million of cash received on exchange-traded derivative positions resulting in a balance of \$(85) million. Restricted cash accounts are included in current other assets on NEE's and FPL's condensed consolidated balance sheets and primarily relate to debt service payments and margin cash collateral requirements (funding) at NEER and bond proceeds held for construction at FPL. In addition, where offsetting positions exist, restricted cash related to margin cash collateral of \$87 million is netted against derivative liabilities at June 30, 2025 and \$279 million is netted against derivative assets at December 31, 2024. See Note 2.

Storm Cost Recovery— In January 2025, FPL began recovering eligible storm costs and replenishment of the storm reserve through a storm surcharge totaling approximately \$1.2 billion, related to Hurricanes Debby, Helene and Miton which impacted FPL's service area in 2024. The amount is being collected over a 12-month period and is subject to refund based on an FPSC prudence review. Recoverable storm costs are recorded as current regulatory assets on NEE's and FPL's condensed consolidated balance sheets. The unpaid portion of the storm restoration costs at June 30, 2025 and December 31, 2024, of

approximately \$137 million and \$557 million, respectively, including estimated capital costs, is included in current other liabilities on NEE's and FPL's condensed consolidated balance sheets.

Structured Payables – At June 30, 2025 and December 31, 2024, NEE's outstanding obligations under its structured payables program were approximately \$1.1 billion and \$4.0 billion, respectively.

Income Taxes – For taxable years beginning after 2022, clean energy tax credits generated during the taxable year can be transferred to an unrelated purchaser for cash and are accounted for under Accounting Standards Codification 740 – Income Taxes. Proceeds resulting from the sales of clean energy tax credits for the six months ended June 30, 2025 and 2024 of approximately \$310 million and \$511 million, respectively, are reported in the cash received for income taxes – net within the supplemental disclosures of cash flow information on NEE's condensed consolidated statements of cash flows. In connection with entering into the agreements to sell clean energy tax credits, NEECH provides certain indemnifications to the purchasers regarding the existence and qualifications of such credits. NEE has not recorded any material liability related to these indemnifications after considering the nature of the indemnifications and NEE's experience in generating and utilizing clean energy tax credits. NEE's exposure to refund credits sold generally terminates based on the individual purchaser's tax return statute of limitations which cannot be estimated.

Noncontrolling Interests – At June 30, 2025 and December 31, 2024, approximately \$8,759 million and \$9,062 million, respectively, of noncontrolling interests on NEE's condensed consolidated balance sheets relates to differential membership interests. For the three months ended June 30, 2025 and 2024, NEE recorded earnings of approximately \$417 million and \$357 million, respectively, and for the six months ended June 30, 2025 and 2024 approximately \$811 million and \$705 million, respectively, associated with differential membership interests, which is reflected as net loss attributable to noncontrolling interests on NEE's condensed consolidated statements of income.

Disposal of a Business – In July 2025, a subsidiary of NextEra Energy Resources entered into an agreement to sell a 50% equity interest in a joint venture, consisting of a rate-regulated transmission asset located in California. NEER expects to close the sale in the first quarter of 2026, subject to the satisfaction of customary closing conditions and the receipt of regulatory approvals, for cash proceeds of approximately \$270 million, subject to closing adjustments. Upon closing, the transmission assets and liabilities will be removed from NEE's balance sheet and NEE's remaining 50% interest will be reflected as an equity method investment.

Property, Plant and Equipment - Property, plant and equipment consists of the following:

	N	Œ		FPL						
	June 30, 2025		December 31, 2024		June 30, 2025		December 31, 2024			
			(mill	ions)						
Electric plant in service and other property	\$ 159,996	\$	151,677	\$	91,213	\$	87,596			
Nuclear fuel	1,786		1,676		1,120		1,140			
Construction work in progress	22,062		21,658		6,994		7,214			
Property, plant and equipment, gross	183,844		175,011		99,327		95,950			
Accumulated depreciation and amortization	(38,102)		(36,159)		(20,442)		(19,784)			
Property, plant and equipment – net	\$ 145,742	\$	138,852	\$	78,885	\$	76,166			

During the three months ended June 30, 2025 and 2024, FPL recorded AFUDC of approximately \$52 million and \$45 million, respectively, including AFUDC – equity of \$40 million and \$37 million, respectively. During the six months ended June 30, 2025 and 2024, FPL recorded AFUDC of approximately \$100 million and \$111 million, respectively, including AFUDC – equity of \$77 million and \$90 million, respectively. During the three months ended June 30, 2025 and 2024, NEER capitalized interest on construction projects of approximately \$159 million and \$112 million, respectively. During the six months ended June 30, 2025 and 2024, NEER capitalized interest on construction projects of approximately \$298 million and \$210 million, respectively.

11. Commitments and Contingencies

Commitments - NEE and its subsidiaries have made commitments in connection with a portion of their projected capital expenditures. Capital expenditures at FPL include, among other things, the cost for construction of additional facilities and equipment to meet customer demand, as well as capital improvements to and maintenance of existing facilities. At NEER, capital expenditures include, among other things, the cost, including capitalized interest, for development, construction and maintenance of its competitive energy businesses.

At June 30, 2025, estimated capital expenditures, on an accrual basis, for the remainder of 2025 through 2029 were as follows:

	Remaind	der of 2025	2026	2027	2028	2029	Total			
				(mill	ions)					
FPL:										
Generation:(a)										
New ^(b)	\$	1,035	\$ 3,925	\$ 3,385	\$	3,385	\$	3,510	\$	15,240
Existing		425	1,160	1,325		1,275		1,275		5,460
Transmission and distribution(c)		2,110	4,255	4,080		4,325		4,710		19,480
Nuclear fuel		155	300	305		395		375		1,530
General and other		470	880	810		790		715		3,665
Total	\$	4,195	\$ 10,520	\$ 9,905	\$	10,170	\$	10,585	\$	45,375
NEER(d)		•								
Wind(e)	\$	1,440	\$ 2,470	\$ 475	\$	75	\$	50	\$	4,510
Solar®		3,810	5,670	2,040		1,570		_		13,090
Other clean energy ^(g)		945	1,935	1,370		95		_		4,345
Nuclear, including nuclear fuel		215	385	420		425		420		1,865
Rate-regulated transmission		720	1,095	700		365		710		3,590
Other		250	340	270		250		265		1,375
Total	\$	7,380	\$ 11,895	\$ 5,275	\$	2,780	\$	1,445	\$	28,775

- Includes AFUDC of approximately \$75 million, \$170 million, \$180 million, \$175 million and \$160 million for the remainder of 2025 through 2029, respectively. Includes land, generation structures, transmission interconnection and integration and licensing.

 Includes AFUDC of approximately \$30 million, \$80 million, \$75 million, \$110 million and \$140 million for the remainder of 2025 through 2029, respectively. Represents capital expenditures for which applicable internal approvals and also, if required, regulatory approvals have been received. Consists of capital expenditures for new wind projects and repowering of existing wind projects lotaling approximately 2,911 MW, and related transmission. Includes capital expenditures for new solar projects (including solar plus battery storage projects) totaling approximately 1,1888 MW and related transmission. Includes capital expenditures primarily for battery storage projects totaling approximately 3,795 MW and related transmission, as well as renewable fuels projects.

The above estimates are subject to continuing review and adjustment and actual capital expenditures may vary significantly from these estimates.

In addition to guarantees noted in Note 5 with regards to XPLR, NEECH has guaranteed or provided indemnifications or letters of credit related to third parties, including certain obligations of investments in joint ventures accounted for under the equity method, totaling approximately \$694 million at June 30, 2025. These obligations primarily related to guaranteeing the residual value of certain financing leases and obligations under purchased power agreements. Payment guarantees and related contracts with respect to unconsolidated entities for which NEE or one of its subsidiaries are the guarantor are recorded at fair value and are included in noncurrent other liabilities on NEE's condensed consolidated balance sheets. Management believes that the exposure associated with these guarantees is not material.

Contracts – In addition to the commitments made in connection with the estimated capital expenditures included in the table in Commitments above, FPL has firm commitments under long-term contracts primarily for the transportation of natural gas with expiration dates through 2042.

At June 30, 2025, NEER has entered into contracts primarily for the purchase of wind turbines, wind towers, solar modules and batteries and related construction and development activities, as well as for the supply of uranium, and the conversion, enrichment and fabrication of nuclear fuel with expiration dates through 2033. Approximately \$5.0 billion of related commitments are included in the estimated capital expenditures table in Commitments above. In addition, NEER has contracts primarily for the transportation and storage of natural gas with expiration dates through 2041.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued) (unaudited)

The required capacity and/or minimum payments under contracts, including those discussed above, at June 30, 2025 were estimated as follows:

	Remain	Remainder of 2025		2026		2027		2028	2029		Thereafter
						(millio	ons)				
FPL(a)	\$	595	\$	1,165	\$	1,135	\$	1,100	\$	1,090	\$ 7,290
NEER(b)(c)	\$	3,510	\$	2,615	\$	515	\$	240	\$	125	\$ 425

Includes approximately \$205 million, \$400 mi

Insurance - Liability for accidents at nuclear power plants is governed by the Price-Anderson Act, which limits the liability of nuclear reactor owners to the amount of insurance available from both private sources and an industry retrospective payment plan. In accordance with this Act, NEE maintains \$500 million of private liability insurance per site, which is the maximum obtainable, except at Duane Arnold which obtained an exemption from the NRC and maintains a \$100 million private liability insurance limit. Each site, except Duane Amold, participates in a secondary financial protection system, which provides up to \$15.8 billion of liability insurance coverage per incident at any nuclear reactor in the U.S. Under the secondary financial protection system, NEE is subject to retrospective assessments of up to \$1,161 million (\$664 million for FPL), plus any applicable taxes, per incident at any nuclear reactor in the U.S., payable at a rate not to exceed \$173 million (\$99 million for FPL) per incident per year. NextEra Energy Resources and FPL are contractually entitled to recover a proportionate share of such assessments from the owners of minority interests in Seabrook and St. Lucie Unit No. 2, which approximates \$20 million and \$25 million, plus any applicable taxes, per incident, respectively.

NEE participates in a nuclear insurance mutual company, Nuclear Electric Insurance Limited (NEIL), which provides property damage, nuclear accident decontamination and premature decommissioning insurance for each plant for losses resulting from damage to its nuclear facilities, either due to accidents or acts of terrorism. Additionally, NEIL provides accidental outage coverage for losses in the event of a major accidental outage at an insured nuclear plant. Pursuant to regulations of the NRC, each company's property damage insurance policies provide that all proceeds from such insurance be applied first to place the plant in a safe and stable condition after a qualifying accident, and second, to decontaminate the plant before any proceeds can be used for decommissioning, plant repair or restoration.

NEE and FPL nuclear facilities each have accident property damage, nuclear accident decontamination and premature decommissioning liability insurance from NEIL with limits of \$1.5 billion, except for Duane Arnold which has a limit of \$50 million due to being in a deferred decommissioning. All the nuclear facilities, except for Duane Arnold, also share an additional \$1.25 billion nuclear accident insurance limit above their dedicated underlying limit. This shared additional excess limit is not subject to reinstatement in the event of a loss. All coverages are subject to sublimits and deductibles.

NEE also participates in an insurance program that provides limited coverage for replacement power costs if a nuclear plant is out of service for an extended period of time because of an accident. In the event of an accident at one of NEE's or another participating insured's nuclear plants, NEE could be assessed up to \$175 million (\$110 million for FPL), plus any applicable taxes, in retrospective premiums in a policy year. NextEra Energy Resources and FPL are contractually entitled to recover a proportionate share of such assessments from the owners of minority interests in Seabrook, Duane Arnold and St. Lucie Unit No. 2, which approximates \$3 million, \$2 million and \$4 million, plus any applicable taxes, respectively.

Due to the high cost and limited coverage available from third-party insurers, NEE does not have property insurance coverage for a substantial portion of either its transmission and distribution property or natural gas pipeline assets. If FPL's storm restoration costs exceed the storm reserve, such storm restoration costs may be recovered, subject to prudence review by the FPSC, through surcharges approved by the FPSC or through securitization provisions pursuant to Florida law. See Note 10 – Storm Cost Recovery

In the event of a loss, the amount of insurance available might not be adequate to cover property damage and other expenses incurred. Uninsured losses and other expenses, to the extent not recovered from customers in the case of FPL, would be borne by NEE and FPL and could have a material adverse effect on NEE's and FPL's financial condition, results of operations and liquidity.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued) (unaudited)

Legal Proceedings – NEE, FPL, and certain current and former executives, are the named defendants in a purported shareholder securities class action lawsuit filed in the U.S. District Court for the Southern District of Florida in June 2023 and amended in December 2023 that seeks from the defendants unspecified damages allegedly resulting from alleged false or misleading statements regarding NEEs alleged campaign finance and other political activities. The alleged class of plaintiffs are all persons or entities who purchased or otherwise acquired NEE securities between December 2, 2021 and January 30, 2023. In September 2024, the class action lawsuit was dismissed with prejudice by the U.S. District Court for the Southern District of Florida. An appeal of the dismissal, which the lead plaintiffs filed with the U.S. Court of Appeals for the 11th Circuit in October 2024, remains pending. NEE is vigorously defending against the claims in this proceeding.

NEE, along with certain current and former executives and directors are the named defendants in purported shareholder derivative actions filed in the 15th Judicial Circuit in Palm Beach County, Florida in July 2023, March 2024 and May 2025, in the U.S. District Court for the Southern District of Florida in October 2023 and November 2023 (which were consolidated in January 2024) and in the U.S. District Court for the Southern District of Florida in July 2024 and May 2025, seeking unspecified damages allegedly resulting from, among other things, breaches of fiduciary duties and, in the consolidated cases and the July 2024 case, violations of the federal securities laws, all purporting to relate to alleged campaign finance law violations and associated matters. The defendants are vigorously defending against the claims in these proceedings. NEE also has received demand letters and books and records requests from counsel representing other purported shareholders and containing similar allegations. These demands seek, among other things, a Board of Directors investigation of, and/or documentation regarding, these allegations. All of these derivative cases, demands and requests are effectively stayed pending the appeal of the securities class action lawsuit described above.

In November 2024, NEE was named as defendant in an antitrust lawsuit (Avangrid, Inc. et al. v. NextEra Energy, Inc.) filed in the U.S. District Court for the District of Massachusetts. This lawsuit seeks damages of \$350 million, which are tripled in the event of a finding of monopolization under the Sherman Act, from the defendants for alleged violations of federal and state antitrust laws, as well as Massachusetts state laws. NEE's motion to dismiss the lawsuit remains pending. NEE is vigorously defending against the claims in this proceeding.

XPLR, NEE and certain NEE executives are the named defendants in a purported federal securities class action lawsuit filed in the U.S. District Court for the Southern District of California in July 2025 that seeks unspecified damages alleging that the defendants made false and misleading statements regarding XPLR's business model, XPLR distributions, and its arrangements relating to noncontrolling Class B members' interests under certain limited liability company agreements to which XPLR and certain of its subsidiaries are or were a party. The alleged class includes all persons or entities other than the defendants who purchased or otherwise acquired XPLR securities between September 27, 2023 and January 27, 2025. NEE plans to vigorously defend against the claims in this proceeding.

12. Segment Information

The tables below present information for NEE's two reportable segments, FPL, a rate-regulated utility business, and NEER, which is comprised of competitive energy and rate-regulated transmission businesses. Corporate and Other represents other business activities, includes eliminating entries, and may include the net effect of rounding. FPL has a single reportable segment. See Note 1 for information regarding NEE's and FPL's operating revenues.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued) (unaudited)

Net income attributable to NEE and significant expenses for NEE's reportable segments and the FPL reportable segment are shown below.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

NEE's operating performance is driven primarily by the operations of its two principal businesses, FPL, which serves more than six million customer accounts in Florida and is one of the largest electric utilities in the U.S., and NEER, which together with affiliated entities is the world's largest generator of renewable energy from the wind and sun based on 2024 MWh produced on a net generation basis, as well as a world leader in battery storage capacity. The table below presents net income (loss) attributable to NEE and earnings (loss) per share attributable to NEE, assuming dilution, by reportable segment, FPL and NEER. Corporate and Other is primarily comprised of the operating results of other business activities, as well as other income and expense items, including interest expense, and eliminating entries, and may include the net effect of rounding. See Note 12 for additional segment information. The following discussions should be read in conjunction with the Notes to Condensed Consolidated Financial Statements contained herein and Management's Discussion and Analysis of Financial Condition and Results of Operations appearing in the 2024 Form 10-K. The results of operations for an interim period generally will not give a true indication of results for the year. In the following discussions, all comparisons are with the corresponding items in the prior year periods.

⁽a) NEER's results reflect an allocation of interest expense from NEECH to NextEra Energy Resources based on a deemed capital structure of 70% debt and differential membership interests sold by NextEra Energy Resources' subsidiaries.

Adjusted Earnings

NEE prepares its financial statements under GAAP. However, management also uses earnings adjusted for certain items (adjusted earnings), a non-GAAP financial measure, internally for financial planning, analysis of performance, reporting of results to the Board of Directors and as an input in determining performance-based compensation under NEE's employee incentive compensation plans. NEE also uses adjusted earnings when communicating its financial results and earnings outlook to analysts and investors. NEE's management believes that adjusted earnings provide a more meaningful representation of NEE's fundamental earnings power. Although these amounts are properly reflected in the determination of net income under GAAP, management believes that the amount and/or nature of such items make period to period comparisons of operations difficult and potentially confusing. Adjusted earnings do not represent a substitute for net income, as prepared under GAAP.

The following table provides details of the after-tax adjustments to net income considered in computing NEE's adjusted earnings discussed above.

	111	30,	aea June	Six Months E	nded .	June 30,
		2025	2024	2025	- :	2024
			(milli	ons)

Change in unrealized gains (losses) on equity securities held in NEER's nuclear decommissioning funds and OTTI, net - NEER	\$	54 \$	(68)	\$ 5	\$	24

Three Months Ended June

⁽a) For the three months ended June 30, 2025 and 2024, approximately \$161 million and \$221 million of losses, respectively, and for the six months ended June 30, 2025 and 2024, approximately \$206 million and \$147 million of losses, respectively, are included in NEER's net income; the balance is included in Corporate and Other. The change in non-qualifying hedge activity is primarily attributable to changes in forward power and natural gas prices, interest rates and foreign currency exchange rates, as well as the reversal of previously recognized unrealized mark-to-market gains or losses as the underlying transactions were realized.

(b) The six months ended June 30, 2025 includes an impairment charge related to the investment in XPLR. See Note 3 – Nonrecurring Fair Value Measurements.

NEE segregates into two categories unrealized mark-to-market gains and losses and timing impacts related to derivative transactions. The first category, referred to as non-qualifying hedges, represents certain energy derivative, interest rate derivative and foreign currency transactions entered into as economic hedges, which do not meet the requirements for hedge accounting, or for which hedge accounting treatment is not elected or has been discontinued. Changes in the fair value of those transactions are marked to market and reported in the condensed consolidated statements of income, resulting in earnings volatility because the economic offset to certain of the positions are generally not marked to market. As a consequence, NEE's net income reflects only the movement in one part of economically-linked transactions. For example, a gain (loss) in the non-qualifying hedge category for certain energy derivatives is offset by decreases (increases) in the fair value of related physical asset positions in the portfolio or contracts, which are not marked to market under GAAP. For this reason, NEE's management views results expressed excluding the impact of the non-qualifying hedges as a meaningful measure of current period performance. The second category, referred to as trading activities, which is included in adjusted earnings, represents the net unrealized effect of actively traded positions entered into to take advantage of expected market price movements and all other commodity hedging activities. At FPL, substantially all changes in the fair value of energy derivative transactions are deferred as a regulatory asset or liability until the contracts are settled, and, upon settlement, any gains or losses are passed through the fuel clause. See Note 2.

RESULTS OF OPERATIONS

Summary

Net income attributable to NEE increased by \$406 million for the three months ended June 30, 2025 reflecting higher results at FPL and NEER, partly offset by lower results at Corporate and Other. Net income attributable to NEE decreased by \$1,028 million for the six months ended June 30, 2025 reflecting lower results at NEER and Corporate and Other, partly offset by higher results at FPL.

FPL's increase in net income for the three and six months ended June 30, 2025 was primarily driven by continued investments in plant in service and other property.

NEER's results increased for the three months ended June 30, 2025 primarily reflecting higher earnings from new investments and customer supply as well as favorable changes in the fair value of equity securities in NEER's nuclear decommissioning funds, partly offset by higher interest expense. NEER's results decreased for the six months ended June 30, 2025 primarily reflecting an impairment charge related to the investment in XPLR as well as higher interest expense, partly offset by higher earnings from new investments

Corporate and Other's results decreased for the three months ended June 30, 2025 primarily due to higher average interest rates and higher average debt balances. Corporate and Other's results decreased for the six months ended June 30, 2025 primarily due to unfavorable non-qualifying hedge activity compared to 2024 as well as higher average interest rates and higher average debt balances.

NEE's effective income tax rates for the three months ended June 30, 2025 and 2024 were approximately (19)% and (5)%, respectively. NEE's effective income tax rates for the six months ended June 30, 2025 and 2024 were approximately (59)% and 5%, respectively. See Note 4 for a discussion of NEE's and FPL's effective income tax

A number of legislative and administrative activities have occurred in 2025 that affect NEE and FPL including the enactment of the OBBBA, the issuance of a number of federal executive orders and presidential actions, the imposition of tariffs on a variety of imports, and the issuance of guidance by various federal agencies. A number of regulatory actions were issued or remain pending, such as Treasury Department guidance regarding clean energy tax credits, trade investigations that may lead to additional tariffs, ordered reviews of, and process changes for, federal permitting and approvals for wind and solar projects and FERC approval of proposals by regional transmission operators regarding the process for interconnecting new generation projects to certain regional transmission grids.

On July 4, 2025, the OBBBA was signed into law. The legislation modifies several pre-existing provisions, including the phase-out of clean energy tax credits, of the Inflation Reduction Act and other laws that are pertinent to NEE including:

• Wind and solar facilities are required to meet two primary requirements to be eligible for technology neutral PTCs and ITCs:

- - First, wind and solar facilities must be placed in service by December 31, 2027. However, the December 31, 2027 placed in service requirement does not have to be satisfied for wind and solar facilities that begin construction before July 4, 2026.
 - Second, wind and solar facilities must satisfy the prohibited foreign entity material assistance requirements. However, facilities that begin construction by December 31, 2025 would be exempt from these requirements.
- Nuclear and battery storage facilities are required to meet two primary requirements to be eligible for clean energy tax credits:
 - First, in order to receive the full clean energy tax credits, nuclear and battery storage facilities must begin construction by December 31, 2033 (no eligibility for facilities that begin construction after 2035).

Second, nuclear and battery storage facilities must satisfy the prohibited foreign entity material assistance requirements. However, facilities that begin
construction by December 31, 2025 would be exempt from these requirements.

NEE and the wind and solar industries have relied on the settled understanding of the term "begin construction" as informed by longstanding Treasury Department guidance regarding what constitutes the "beginning of construction" for purposes of claiming clean energy tax credits. NEE believes that the text of the OBBBA and applicable law are consistent with that, such that the financial commitments NEE has made over time prior to the enactment of the OBBBA based on guidance in effect at the time should allow for the wind and solar facilities that NEE plans to place in service through 2029 to qualify for clean energy tax credits.

On July 7, 2025, a federal executive order was issued directing the Secretary of the Treasury to issue new and revised guidance that could potentially seek to limit the interpretation of "begin construction" requirements for wind and solar facilities. NEE will assess any guidance under the executive order when it is issued.

NEE continues to assess the implications of the OBBBA, as well as the foregoing and other federal executive orders, investigations and other pending or anticipated regulatory actions on its business and has taken and expects to continue to take actions that are intended to reduce the impacts of these developments on its project development, capital improvement and maintenance activities. There has been no material impact on NEE's or FPL's operations or financial performance as a result of these developments to date in 2025, but NEE will continue to assess these and further developments for potential impacts in future periods. In expressing its opinions and beliefs on the matters above, NEE cannot guarantee the outcomes expressed herein.

FPL: Results of Operations

Investments in plant in service and other property grew FPL's average rate base by approximately \$5.3 billion for both the three and six months ended June 30, 2025 when compared to the same periods in the prior year, reflecting, among other things, solar generation additions and ongoing transmission and distribution additions.

The use of reserve amortization is permitted by FPL's 2021 rate agreement. In order to earn a targeted regulatory ROE, subject to limitations associated with the 2021 rate agreement, reserve amortization is calculated using a trailing thirteen-month average of retail rate base and capital structure in conjunction with the trailing twelve months regulatory retail base net operating income, which primarily includes the retail base portion of base and other revenues, net of O&M, depreciation and amortization, interest and tax expenses. In general, the net impact of these income statement line items must be adjusted, in part, by reserve amortization to earn the targeted regulatory ROE. In certain periods, reserve amortization is reversed so as not to exceed the targeted regulatory ROE. The drivers of FPL's net income not reflected in the reserve amortization calculation typically include wholesale and transmission service revenues and expenses, cost recovery clause revenues and expenses, AFUDC – equity and revenue and costs not recoverable from retail customers. During the three and six months ended June 30, 2025, FPL recorded reserve amortization of \$19 million and \$641 million, respectively. During the three and six months ended June 30, 2024, FPL recorded reserve amortization of \$66 million and \$637 million, respectively. See Depreciation and Amortization Expense below. FPL earned an approximately 11.60% and 11.80% regulatory ROE on its retail rate base, based on a trailing thirteen-month average retail rate base as of June 30, 2025 and June 30, 2024, respectively.

In January 2025, FPL began recovering eligible storm costs and replenishment of the storm reserve through a storm surcharge totaling approximately \$1.2 billion, related to Hurricanes Debby, Helene and Miton which impacted FPL's service area in 2024. The amount is being collected over a 12-month period and is subject to refund based on an FPSC prudence review. See Note 10 – Storm Cost Recovery.

On February 28, 2025, FPL filed a petition with the FPSC requesting, among other things, approval of a four-year base rate plan that would begin in January 2026 replacing the 2021 rate agreement. See Note 10 – FPL 2025 Base Rate Proceeding.

In July 2025, the Florida Supreme Court affirmed the FPSC's final and supplemental final order regarding FPL's 2021 rate agreement. See Note 10 – FPL 2021 Rate Agreement.

Operating Revenues

During the three and six months ended June 30, 2025, operating revenues increased \$319 million and \$481 million, respectively, primarily reflecting an increase in storm cost recovery revenues of approximately \$308 million and \$426 million, respectively, primarily associated with Hurricanes Debby, Helene and Miton, as discussed above. Additionally, retail base revenues increased approximately \$73 million and \$159 million during the three and six months ended June 30, 2025, respectively, which was primarily related to an increase of 1.7% in the average number of customer accounts for both periods. The increases in operating revenues for the three and six months ended June 30, 2025 also reflect increases of approximately \$63 million and \$120 million, respectively, in revenues from the storm protection plan cost recovery clause as a result of increased investments. The increases in operating revenues for the three and six months ended June 30, 2025 were partly offset by decreases in fuel revenues of approximately \$145 million and \$262 million, respectively, primarily related to lower fuel rates.

Fuel, Purchased Power and Interchange Expense

Fuel, purchased power and interchange expense decreased \$135 million and \$234 million for the three and six months ended June 30, 2025, respectively, primarily reflecting lower amortization of deferred fuel costs as compared to the prior year periods.

Depreciation and Amortization Expense

Depreciation and amortization expense increased \$386 million and \$491 million during the three and six months ended June 30, 2025, respectively, primarily reflecting approximately \$308 million and \$426 million of higher amortization of deferred storm cost expenses primarily associated with Hurricanes Debby, Helene and Milton, as discussed above. During the three months ended June 30, 2025 and 2024, FPL recorded reserve amortization of approximately \$19 million and \$66 million, respectively. During the six months ended June 30, 2025 and 2024, FPL recorded reserve amortization of approximately \$641 million and \$66 million, respectively. Reserve amortization, or reversal of such amortization, reflects adjustments to accrued asset removal costs provided under the 2021 rate agreement in order to achieve the targeted regulatory ROE. Reserve amortization is recorded as either an increase or decrease to accrued asset removal costs which is reflected in noncurrent regulatory assets on the condensed consolidated balance sheets. At June 30, 2025, approximately \$254 million of reserve amortization remains available under the 2021 rate agreement.

Income Taxes

During the three and six months ended June 30, 2025, FPL's income taxes decreased \$93 million and \$157 million, respectively, primarily related to higher clean energy tax credits as compared to the prior year periods.

NEER: Results of Operations

NEER's results increased \$431 million and decreased \$363 million for the three and six months ended June 30, 2025, respectively. The primary drivers, on an after-tax basis, of the changes are in the following table.

	Increase (Decrease) From Prior Year Period					
		nths Ended June 30, 2025	Six Montl	ns Ended June 30, 2025		
		(milli	ons)			
New investments ^(a)	\$	298	\$	536		
Existing clean energy ^(e)		(48)		(108)		
Customer supply ^(b)		133		114		
NEET(a)		8		24		
Other, including interest expense, corporate general and administrative expenses and other investment income		(165)		(255)		
Change in non-qualifying hedge activity ^(c)		60		(59)		
Change in unrealized gains/losses on equity securities held in nuclear decommissioning funds and OTTI, netc		122		(19)		
XPLR investment gains, net(c)		23		(596)		
Change in net income less net loss attributable to noncontrolling interests	\$	431	\$	(363)		

Reflects after-tax project contributions, including the net effect of deferred income taxes and other benefits associated with clean energy tax credits for wind, solar and storage projects, as applicable, but excludes allocation of interest expense and corporate general and administrative expenses, except for an allocated credit support charge related to guarantees issued to conduct business activities. Results from projects, projectines and rate-regulated transmission facilities and transmission line are included in existing clean energy and rate-regulated transmission lines are included in NEET beginning with the thirteenth month of operation or ownership. Excludes allocation of interest expense and corporate general and administrative expenses, except for an allocated credit support charge related to guarantees issued to conduct business activities, and includes natural gas, natural gas liquids and oil production results.

See Overview – Adjusted Earnings for additional information.

(c)

New Investments

Results from new investments for the three and six months ended June 30, 2025 increased primarily due to higher earnings related to new wind and solar generation and battery storage facilities that entered service during or after the three and six months ended June 30, 2024.

Customer Supply

Results from customer supply increased for the three and six months ended June 30, 2025 primarily reflecting the absence of higher depletion from natural gas and oil production assets in the comparable prior year periods.

Other Factors
Supplemental to the primary drivers of the changes in NEER's results discussed above, the discussion below describes changes in certain line items set forth in NEE's condensed consolidated statements of income as they relate to NEER.

Operating Revenues

Operating revenues for the three months ended June 30, 2025 increased \$269 million primarily due to:

- revenues from new investments of \$115 million; and
- the impact of non-qualifying commodity hedges due primarily to changes in energy prices (approximately \$175 million of losses for the three months ended June 30, 2025 compared to \$284 million of losses for the comparable period in 2024).

Operating revenues for the six months ended June 30, 2025 increased \$567 million primarily due to:

- the impact of non-qualifying commodity hedges due primarily to changes in energy prices (approximately \$13 million of gains for the six months ended June 30, 2025 compared to \$232 million of losses for the comparable period in 2024);
- revenues from new investments of \$225 million
- net increases in revenues of \$177 million from the customer supply business; partly offset by,
- net decreases in revenues of \$102 million from the existing clean energy business.

Operating Expenses - net

Operating expenses – net for the six months ended June 30, 2025 increased \$129 million primarily due to an increase of \$67 million in depreciation and amortization.

Interest Expense

NEER's interest expense for the three months ended June 30, 2025 increased \$115 million primarily reflecting higher average debt balances. NEER's interest expense for the six months ended June 30, 2025 increased \$491 million primarily reflecting approximately \$351 million of unfavorable impacts related to changes in the fair value of interest rate derivative instruments as well as higher average debt balances.

Equity in Earnings (Losses) of Equity Method Investees
NEER recognized \$469 million of equity in losses of equity method investees for the six months ended June 30, 2025, compared to \$341 million of equity in earnings of equity method investees for the six months ended June 30, 2024. The change for the six months ended June 30, 2025 primarily reflects losses related to the investment in XPLR including an impairment charge of approximately \$0.7 billion (\$0.5 billion after tax) (see Note 3 – Nonrecurring Fair Value Measurements), partly offset by higher net earnings of \$134 million related to NEER's other equity method investments.

Change in Unrealized Gains (Losses) on Equity Securities Held in NEER's Nuclear Decommissioning Funds – net

For the three months ended June 30, 2025, changes in the fair value of equity securities in NEER's nuclear decommissioning funds related to favorable market conditions in 2025 compared to the prior year period.

Income Taxes

PTCs from wind and solar projects and ITCs from solar, battery storage and certain wind projects are included in NEER's earnings. PTCs are recognized as wind and solar energy is generated and sold based on a per kWh rate prescribed in applicable federal and state statutes. NEER's effective income tax rate is primarily based on the composition of pretax income (loss) in the periods presented, as well as the amount of clean energy tax credits in the periods presented, as well as the amount of clean energy tax credits in the periods presented. During the three and six months ended June 30, 2025, clean energy tax credits increased by approximately \$164 million and \$363 million, respectively, reflecting growth in NEER's business. See Note 4.

Corporate and Other: Results of Operations

Corporate and Other is primarily comprised of the operating results of other business activities, as well as corporate interest income and expenses. Corporate and Other allocates a portion of NEECH's corporate interest expense to NextEra Energy Resources. Interest expense is allocated based on a deemed capital structure of 70% debt and differential membership interests sold by NextEra Energy Resources' subsidiaries.

Corporate and Other's results decreased \$68 million during the three months ended June 30, 2025 primarily due to higher average interest rates and higher average debt balances. Corporate and Other's results decreased \$852 million during the six months ended June 30, 2025 primarily due to unfavorable after-tax impacts of approximately \$719 million, as compared to the prior year period, related to non-qualifying hedge activity as a result of changes in the fair value of interest rate derivative instruments as well as higher average interest rates and higher average debt balances.

LIQUIDITY AND CAPITAL RESOURCES

NEE and its subsidiaries require funds to support and grow their businesses. These funds are used for, among other things, working capital (see Note 10 – Storm Cost Recovery), capital expenditures (see Note 11 – Commitments), investments in or acquisitions of assets and businesses, payment of maturing debt and related derivative obligations (see Note 8 and Note 2) and, from time to time, redemption or repurchase of outstanding debt or equity securities. It is anticipated that these requirements will be satisfied through a combination of cash flows from operations, short- and long-term borrowings, the issuance of short- and long-term debt (see Note 8) and, from time to time, equity securities, proceeds from differential membership investors, sales of clean energy tax credits (see Note 10 – Income Taxes) and sales of ownership interests in assets/businesses (see Note 10 – Disposal of a Business), consistent with NEE's and FPL's objective of maintaining, on a long-term basis, a capital structure that will support a strong investment grade credit rating. NEE, FPL and NEECH rely on access to credit and capital markets as significant sources of liquidity for capital requirements and other operations that are not satisfied by operating cash flows. The inability of NEE, FPL and NEECH to maintain their current credit ratings could affect their ability to raise short- and long-term capital, their cost of capital and the execution of their respective financing strategies, and could require the posting of additional collateral under certain agreements.

Cash Flows

NEE's sources and uses of cash for the six months ended June 30, 2025 and 2024 were as follows:

	Six Months E	nded June 30,
	2025	2024
	(mill	lions)
Sources of cash:		
Cash flows from operating activities	\$ 5,958	\$ 7,010
Issuances of long-term debt, including premiums and discounts	12,996	14,111
Sale of independent power and other investments of N⊞R	309	951
Issuances of common stock/equity units	22	20
Net increase in commercial paper and other short-term debt	2,907	1,931
Other sources – net	22	
Total sources of cash	22,214	24,023
Uses of cash:		
Capital expenditures, independent power and other investments and nuclear fuel purchases	(13,626)	(14,634)
Retirements of long-termdebt	(5,160)	(6,499)
Repayments of cash swept to related parties – net	(129)	(830)
Dividends on common stock	(2,332)	(2,115)
Other uses – net	(394)	(1,261)
Total uses of cash	(21,641)	(25,339)
Effects of currency translation on cash, cash equivalents and restricted cash	7	(2)
Net increase (decrease) in cash, cash equivalents and restricted cash	\$ 580	\$ (1,318)

NEE's primary capital requirements are for expanding and enhancing FPL's electric system and generation facilities to continue to provide reliable service to meet customer electricity demands and for funding NEER's investments in independent power and other projects. See Note 11 – Commitments for estimated capital expenditures for the remainder of 2025 through 2029.

The following table provides a summary of capital investments for the six months ended June 30, 2025 and 2024.

	S	x Months 🗄	nded .	June 30,
		2025		2024
		(milli	ions)

Liquidity

At June 30, 2025, NEE's total net available liquidity was approximately \$17.1 billion. The table below provides the components of FPL's and NEECH's net available liquidity at June 30, 2025.

					Matu	rity Date	
		FPL	NEECH		Total	FPL	NEECH
			(millions)				
Syndicated revolving credit facilities	\$	3,346	\$ 10,519	\$	13,865	2028 - 2030	2025 - 2030
Issued letters of credit		(3)	(495)		(498)		
		3,343	10,024		13,367		
Bilateral revolving credit facilities [®]		2,580	3,550		6,130	2025 - 2028	2025 - 2027
Borrowings		_	(550)		(550)		
		2,580	3,000		5,580		
	_			_			
Letter of credit facilities ^{c)}		_	3,821		3,821		2025 - 2028
Issued letters of credit		_	(3,052)		(3,052)		
			769		769		
Subtotal		5,923	13,793		19,716		
Captotal		0,020	10,700		10,7 10		
Cash and cash equivalents		131	1,592		1,723		
Commercial paper and other short-term borrowings outstanding ^(d)		(1,327)	(2,917)		(4,244)		
Cash swept from unconsolidated entities			(122)		(122)		
Net available liquidity	\$	4,727	\$ 12,346	\$	17,073		

Provide for the funding of loans up to the amount of the credit facility and the issuance of letters of credit up to \$3,200 million (\$450 million for FPL and \$2,750 million for NEECH). The entire amount of the credit facilities is available for general corporate purposes and to provide additional liquidity in the event of a loss to the companies or their subsidiaries' operating facilities (including, in the case of FPL, a transmission and distribution property loss). FPL's syndicated revolving credit facilities are also available to support the purchase of \$1,663 million of pollution control, solid waste disposal and industrial development revenue bonds in the event they are tendered by individual bondfolders and not remarketed prior to maturity. As of June 30, 2025, approximately \$5,239 million of NEECH's syndicated revolving credit facilities expire over the next 12 months. Only available for the funding of loans. As of June 30, 2025, approximately \$1,875 million of FPL's and \$2,300 million of NEECH's bilateral revolving credit facilities expire over the next 12 months. Excludes short-term borrowings under NEECH's bilateral revolving credit facilities expire over the next 12 months.

Capital Support

Guarantees, Letters of Credit, Surety Bonds and Indemnifications (Guarantee Arrangements)
Certain subsidiaries of NEE issue guarantees and obtain letters of credit and surety bonds, as well as provide indemnities, to facilitate commercial transactions with third parties and financings. Substantially all of the guarantee arrangements are on behalf of NEE's consolidated subsidiaries, as discussed in more detail below. See Note 5 regarding guarantees of obligations on behalf of XPLR subsidiaries. NEE is not required to recognize liabilities associated with guarantee arrangements issued on behalf of its consolidated subsidiaries unless it becomes probable that they will be required to perform. At June 30, 2025, NEE believes that there is no material exposure related to these guarantee arrangements.

NEE subsidiaries issue guarantees related to equity contribution agreements and engineering, procurement and construction agreements, associated with the development, construction and financing of certain power generation facilities (see Note 10 – Structured Payables) and a natural gas pipeline project, as well as a natural gas transportation agreement. Commitments associated with these activities are included in the contracts table in Note 11.

In addition, at June 30, 2025, NEE subsidiaries had approximately \$6.5 billion in guarantees related to obligations under purchased power and acquisition agreements, nuclear-related activities, payment obligations related to PTCs, support for NEER's retail electricity provider activities, as well as other types of contractual obligations (see Note 11 - Commitments).

In some instances, subsidiaries of NEE elect to issue guarantees instead of posting other forms of collateral required under certain financing arrangements, as well as for other project-level cash management activities. At June 30, 2025, these guarantees totaled approximately \$2.0 billion and support, among other things, cash management activities, including those related to debt service and operations and maintenance service agreements, as well as other specific project financing requirements

Subsidiaries of NEE also issue guarantees to support customer supply and proprietary power and gas trading activities, including the buying and selling of wholesale energy commodities. At June 30, 2025, the estimated mark-to-market exposure (the total amount that these subsidiaries of NEE could be required to fund based on energy commodity market prices at June 30, 2025) plus contract settlement net payables, net of collateral posted for obligations under these guarantees, totaled approximately \$1.6 billion.

At June 30, 2025, subsidiaries of NEE also had approximately \$5.9 billion of standby letters of credit and approximately \$1.6 billion of surety bonds to support certain of the commercial activities discussed above. FPL's and NEECH's credit facilities are available to support substantially all of the standby letters of credit.

In addition, as part of contract negotiations in the normal course of business, certain subsidiaries of NEE have agreed and in the future may agree to make payments to compensate or indemnify other parties, including those associated with asset divestitures, for possible unfavorable financial consequences resulting from specified events. The specified events may include, but are not limited to, an adverse judgment in a lawsuit, or the imposition of additional taxes due to a change in tax law or interpretations of the tax law. NEE is unable to estimate the maximum potential amount of future payments by its subsidiaries under some of these contracts because events that would obligate them to make payments have not occurred or, if any such event has occurred, they have not been notified of its occurrence.

NEECH, a 100% owned subsidiary of NEE, provides funding for, and holds ownership interests in, NEE's operating subsidiaries other than FPL. NEE has fully and unconditionally guaranteed certain payment obligations of NEECH, including most of its debt and all of its debentures registered pursuant to the Securities Act of 1933 and commercial paper issuances, as well as most of its payment guarantees and indemnifications, and NEECH has guaranteed certain debt and other obligations of subsidiaries within the NEER segment. Certain guarantee arrangements described above contain requirements for NEECH and FPL to maintain a specified credit rating.

NEE fully and unconditionally guarantees NEECH debentures pursuant to a guarantee agreement, dated as of June 1, 1999 (1999 guarantee) and NEECH junior subordinated debentures pursuant to an indenture, dated as of September 1, 2006 (2006 guarantee). The 1999 guarantee is an unsecured obligation of NEE and ranks equally and ratably with all other unsecured and unsubordinated indebtedness of NEE. The 2006 guarantee is unsecured and subordinate and junior in right of payment to NEE senior indebtedness (as defined therein). No payment on those junior subordinated debentures may be made under the 2006 guarantee until all NEE senior indebtedness has been paid in full in certain circumstances. NEE's and NEECH's ability to meet their financial obligations are primarily dependent on their subsidiaries' net income, cash flows and their ability to pay upstream dividends or to repay funds to NEE and NEECH. The dividend-paying ability of some of the subsidiaries is limited by contractual restrictions which are contained in outstanding financing agreements.

Summarized financial information of NEE and NEECH is as follows:

	Six Months Ended June 30, 2025						Year Ended December 31, 2024

⁽b) Information has been prepared on the same basis of accounting as NEE's condensed consolidated financial statements

CRITICAL ACCOUNTING ESTIMATES

Critical accounting estimates are those that NEE believes are both most important to the portrayal of its financial condition and results of operations, and require complex, subjective judgments, often as a result of the need to make assumptions about the effect of matters that are inherently uncertain. Judgments and uncertainties affecting the critical accounting estimates may result in materially different amounts being reported under different conditions or using different assumptions. NEE's significant accounting policies, including those requiring critical accounting estimates, were reported in NEE's 2024 Form 10-K. There have been no material changes regarding these significant accounting policies, including critical accounting estimates.

See Note 3 – Nonrecurring Fair Value Measurements for a discussion of an impairment related to NextEra Energy Resources' equity method investment in XPLR.

ENERGY MARKETING AND TRADING AND MARKET RISK SENSITIVITY

NEE and FPL are exposed to risks associated with adverse changes in commodity prices, interest rates and equity prices. Financial instruments and positions affecting the financial statements of NEE and FPL described below are held primarily for purposes other than trading. Market risk is measured as the potential loss in fair value resulting from hypothetical reasonably possible changes in commodity prices, interest rates or equity prices over the next year. Management has established risk management policies to monitor and manage such market risks, as well as credit risks.

Commodity Price Risk

NEE and FPL use derivative instruments (primarily swaps, options, futures and forwards) to manage the physical and financial risks inherent in the purchase and sale of fuel and electricity. In addition, NEE, through NEER, uses derivatives to optimize the value of its power generation and natural gas and oil production assets and engages in power and fuel marketing and trading activities to take advantage of expected future favorable price movements. See Note 2.

The changes in the fair value of NEE's consolidated subsidiaries' energy contract derivative instruments for the three and six months ended June 30, 2025 were as follows:

			Hedges on (
		Trading	Non- Qualifying		FPL Cost Recovery Clauses	NEE Total
			(mill	lions)

With respect to commodities, NEE's Exposure Management Committee (EMC), which is comprised of certain members of senior management, and NEE's chief executive officer are responsible for the overall approval of market risk management policies and the delegation of approval and authorization levels. The EMC and NEE's chief executive officer receive periodic updates on market positions and related exposures, credit exposures and overall risk management activities.

NEE uses a value-at-risk (VaR) model to measure commodity price market risk in its trading and mark-to-market portfolios. The VaR is the estimated loss of market value based on a one-day holding period at a 95% confidence level using historical simulation methodology. The VaR figures are as follows:

			Trading ^(a)		 and Hedges Recovery	sin FPL	. Čost			Total	
		FPL		NEE	 FPL		NEE	F	PL		NEE
	·				(mil	lions)					
December 31, 2024	\$		— \$	6	\$ 3	\$	98	\$	3	3 \$	88
June 30, 2025	\$		— \$	18	\$ 10	\$	79	\$	10	\$	75
Average for the six months ended June 30, 2025	\$		- \$	18	\$ 15	\$	106	\$	15	\$	108

The VaR figures for the trading portfolio include positions that are marked to market. Taking into consideration off setting unmarked non-derivative positions, such as physical inventory, the trading VaR figures were approximately \$3 million and \$5 million at June 30, 2025 and December 31, 2024, respectively. Non-qualifying hedges are employed to reduce the market risk exposure to physical assets or contracts which are not marked to market. The VaR figures for the non-qualifying hedges and hedges in FPL cost recovery clauses category do not represent the economic exposure to commodity price movements.

Interest Rate Risk

NEE's and FPL's financial results are exposed to risk resulting from changes in interest rates as a result of their respective outstanding and expected future issuances of debt, investments in special use funds and other investments. NEE and FPL manage their respective interest rate exposure by monitoring current interest rates, entering into interest rate contracts and using a combination of fixed rate and variable rate debt. Interest rate contracts are used to mitigate and adjust interest rate exposure when deemed appropriate based upon market conditions or when required by financing agreements.

The following are estimates of the fair value of NEE's and FPL's financial instruments that are exposed to interest rate risk:

	 June 3	30, 2	025		Decembe	er 31	, 2024
	Carrying Amount		Estimated Fair Value ^(a)		Carrying Amount		Estimated Fair Value(a)
			(million	s)			
NEE:							
Special use funds	\$ 2,335	\$	2,335	\$	2,294	\$	2,294
Other investments, primarily debt securities	\$ 2,215	\$	2,215	\$	2,007	\$	2,007
Long-term debt, including current portion	\$ 88,395	\$	85,699	\$	80,446	\$	76,428
Interest rate contracts – net unrealized gains (losses)	\$ (670)	\$	(670)	\$	293	\$	293
FPL:							
Special use funds	\$ 1,795	\$	1,795	\$	1,741	\$	1,741
Long-term debt, including current portion	\$ 27,602	\$	26,081	\$	26,745	\$	24,718

⁽a) See Notes 2 and 3.

The special use funds of NEE and FPL consist of restricted funds set aside to cover the cost of storm damage for FPL and for the decommissioning of NEE's and FPL's nuclear power plants. A portion of these funds is invested in fixed income debt securities primarily carried at estimated fair value. At FPL, changes in fair value, including any credit losses, result in a corresponding adjustment to the related regulatory asset or liability accounts based on current regulatory treatment. The changes in fair value for NEE's non-rate regulated operations result in a corresponding adjustment to OCI, except for credit losses and unrealized losses on available for sale securities intended or required to be sold prior to recovery of the amortized cost basis, which are reported in current period earnings. Because the funds set aside by FPL for storm damage could be needed at any time, the related investments are generally more liquid and, therefore, are less sensitive to changes in interest rates. The nuclear decommissioning funds, in contrast, are generally invested in longer-term securities.

At June 30, 2025, NEE had interest rate contracts with a net notional amount of approximately \$45.2 billion to manage exposure to the variability of cash flows primarily associated with expected future and outstanding debt issuances at NEECH and NEER. See Note 2.

Based upon a hypothetical 10% decrease in interest rates, the fair value of NEE's net liabilities would increase by approximately \$3,732 million (\$1,268 million for FPL) at June 30, 2025.

Equity Price Risk

NEE and FPL are exposed to risk resulting from changes in prices for equity securities. For example, NEE's nuclear decommissioning reserve funds include marketable equity securities carried at their market value of approximately \$6,473 million and \$6,164 million (\$4,457 million and \$4,219 million for FPL) at June 30, 2025 and December 31, 2024, respectively. NEE's and FPL's investment strategy for equity securities in their nuclear decommissioning reserve funds emphasizes marketable securities which are broadly diversified. At June 30, 2025, a hypothetical 10% decrease in the prices quoted on stock exchanges would result in an approximately \$598 million (\$406 million for FPL) reduction in fair value. For FPL, a corresponding adjustment would be made to the related regulatory asset or liability accounts based on current regulatory treatment, and for NEE's non-rate regulated operations, a corresponding amount would be recorded in change in unrealized gains (losses) on equity securities held in NEER's nuclear decommissioning funds – net in NEE's condensed consolidated statements of income. See Note 3.

Credit Risk

NEE and its subsidiaries, including FPL, are also exposed to credit risk through their energy marketing and trading operations. Credit risk is the risk that a financial loss will be incurred if a counterparty to a transaction does not fulfill its financial obligation. NEE manages counterparty credit risk for its subsidiaries with energy marketing and trading operations through established policies, including counterparty credit limits, and in some cases credit enhancements, such as cash prepayments, letters of credit, cash and other collateral and guarantees.

Credit risk is also managed through the use of master netting agreements. NEE's credit department monitors current and forward credit exposure to counterparties and their affiliates, both on an individual and an aggregate basis. For all derivative and contractual transactions, NEE's energy marketing and trading operations, which include FPL's energy marketing and trading division, are exposed to losses in the event of nonperformance by counterparties to these transactions. Some relevant considerations when assessing NEE's energy marketing and trading operations' credit risk exposure include the following:

- · Operations are primarily concentrated in the energy industry.
- Trade receivables and other financial instruments are predominately with energy, utility and financial services related companies, as well as municipalities, cooperatives and other trading companies in the U.S.
- · Overall credit risk is managed through established credit policies and is overseen by the EMC.
- Prospective and existing customers are reviewed for creditworthiness based upon established standards, with customers not meeting minimum standards
 providing various credit enhancements or secured payment terms, such as letters of credit or the posting of margin cash collateral.
- Master netting agreements are used to offset cash and noncash gains and losses arising from derivative instruments with the same counterparty. NEE's policy is to have master netting agreements in place with significant counterparties.

Based on NEE's policies and risk exposures related to credit, NEE and FPL do not anticipate a material adverse effect on their financial statements as a result of counterparty nonperformance. At June 30, 2025, NEE's credit risk exposure associated with its energy marketing and trading operations, taking into account collateral and contractual netting rights, totaled approximately \$2.9 billion (\$92 million for FPL), of which approximately 92% (99% for FPL) was with companies that have investment grade credit ratings. See Note 2.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

See Management's Discussion - Energy Marketing and Trading and Market Risk Sensitivity.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

As of June 30, 2025, each of NEE and FPL had performed an evaluation, under the supervision and with the participation of its management, including NEE's and FPL's chief executive officer and chief financial officer, of the effectiveness of the design and operation of each company's disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 Rules 13a-15(e) and 15d-15(e)). Based upon that evaluation, the chief executive officer and the chief financial officer of each of NEE and FPL concluded that the company's disclosure controls and procedures were effective as of June 30, 2025.

(b) Changes in Internal Control Over Financial Reporting

NEE and FPL are continuously seeking to improve the efficiency and effectiveness of their operations and of their internal controls. This results in refinements to processes throughout NEE and FPL. However, there has been no change in NEE's or FPL's internal control over financial reporting (as defined in the Securities Exchange Act of 1934 Rules 13a-15(f) and 15d-15(f)) that occurred during NEE's and FPL's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, NEE's or FPL's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

See Note 11 - Legal Proceedings.

With regard to environmental proceedings to which a governmental authority is a party, NEE's and FPL's policy is to disclose any such proceeding if it is reasonably expected to result in monetary sanctions of greater than or equal to \$1 million.

Item 1A. Risk Factors

There have been no material changes from the risk factors disclosed in the 2024 Form 10-K. The factors discussed in Part I, Item 1A Risk Factors in the 2024 Form 10-K, as well as other information set forth in this report, which could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects should be carefully considered. The risks described in the 2024 Form 10-K are not the only risks facing NEE and FPL. Additional risks and uncertainties not currently known to NEE or FPL, or that are currently deemed to be immaterial, also may materially adversely affect NEE's or FPL's business, financial condition, results of operations and prospects.

Item 2. Unregistered Sales of Equity Securities, Use of Proceeds, and Issuer Purchases of Equity Securities

(a) Information regarding purchases made by NEE of its common stock during the three months ended June 30, 2025 is as follows:

Period	Total Number of Shares Purchased ^(a)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of a Publicly Announced Program	Maximum Number of Shares that May Yet be Purchased Under the Program [®]
4/1/25 – 4/30/25		\$	_	180,000,000
5/1/25 - 5/31/25	13,037	\$ 73.81	_	180,000,000
6/1/25 - 6/30/25	_	\$	-	180,000,000
Total	13,037	\$ 73.81		

Item 5 Other Information

- (c) Rule 10b5-1 trading arrangements adopted during the three months ended June 30, 2025 were as follows:
 - On April 28, 2025, Robert Coffey, Executive Vice President Nuclear Division and Chief Nuclear Officer, adopted a Rule 10b5-1 trading arrangement that is intended to satisfy the affirmative defense of Rule 10b5-1(c) for the sale of 7,500 shares of NEE's common stock until April 28, 2026.

 On June 9, 2025, Michael Dunne, Executive Vice President and Chief Financial Officer, adopted a Rule 10b5-1 trading arrangement that is intended to satisfy
 - the affirmative defense of Rule 10b5-1(c) for the sale of 10,000 shares of NEE's common stock until April 30, 2026.
 - On June 11, 2025, Mark Lemasney, Executive Vice President Power Generation Division, adopted a Rule 10b5-1 trading arrangement that is intended to satisfy the affirmative defense of Rule 10b5-1(c) for the sale of 2,500 shares of NEE's common stock until March 6, 2026.

Includes shares of common stock withheld from employees to pay certain withholding taxes upon the vesting of stock awards granted to such employees under the NextEra Energy, Inc. 2021 Long Term Incentive Plan.

In May 2017, NIEE's Board of Directors authorized repurchases of up to 45 million shares of common stock (180 million shares after giving effect to the four-for-one stock split of NEE common stock effective October 26, 2020) over an unspecified period.
